## Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Employment, earnings and hours

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-7165) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(992-4734)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1(112)800-667-3524
Alberta	1-800-222-6400
British Columbia (South and Central)	112-800-663-1551

Northwest Territories (area served by NorthwesTel Inc.)	Zenith 2-2015

## How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0T6.

## Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Emploi, gains et durée du travail

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-7165) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(992-4734)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

## COMMENTARY

### Preliminary Estimates<sup>1</sup> - March 1984 (Unadjusted data)

The preliminary estimates of employment for Canada industrial aggregate<sup>2</sup> increased by 0.4% from February to March 1984. The construction, transportation, communication and other utilities, trade and service industries increased while the remaining industries registered decreases. All provinces and territories contributed to the increase.

Average weekly earnings, at the Canada industrial aggregate level, increased by 0.4% from \$398.71 in February to \$400.17 in March. All industries increased except forestry, mining and finance, insurance and real estate which decreased. All provinces and territories increased except Newfoundland, New Brunswick, Manitoba and Alberta which decreased.

---

<sup>1</sup> See note on "Statistical Presentation" under "Concepts and Methods" at the back of this publication.

<sup>2</sup> Industrial Aggregate is the sum of all industries with the exception of agriculture, fishing and trapping, private household services, religious organizations, and military services.

## OBSERVATIONS

### Estimations préliminaires<sup>1</sup> - Mars 1984 (chiffres non désaisonnalisés)

Les estimations préliminaires de l'emploi pour l'ensemble des activités économique<sup>2</sup> au Canada indiquent une augmentation de 0.4% de février à mars 1984. On observe une hausse dans la construction, les transports, communications et autres services publics, le commerce et les services alors que les autres industries ont diminué. Toutes les provinces et territoires ont contribué à cette augmentation.

Les gains hebdomadaires moyens pour l'ensemble des activités économique au Canada ont augmenté de 0.4% passant de \$398.71 en février à \$400.17 en mars. Toutes les divisions de l'activité économique ont augmenté à l'exception du forestage, des mines et des finances, assurances et affaires immobilières qui ont diminué. Toutes les provinces et territoires ont augmenté à l'exception de Terre-Neuve, du Nouveau-Brunswick, du Manitoba et de l'Alberta qui ont enregistré des baisses.

---

<sup>1</sup> Voir la partie "Présentation statistique" sous la rubrique "concepts et méthodes", à la fin de cette publication.

<sup>2</sup> L'ensemble des activités économiques comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, le service domestique des ménages, les organismes religieux et les services de la défense.

## NOTE TO USERS

Effective with the April 1983 reference month, the estimates contained in this publication replace those previously published in catalogue numbers 72-002 (Employment, Earnings and Hours) and 72-008 (Estimates of Employees by Province and Industry).

These new estimates are obtained from the revised monthly Survey of Employment, Payrolls and Hours. The major characteristics of this survey are as follows:

1. It includes firms of all sizes;
2. It covers all industries except agriculture, fishing and trapping, household services, religious organizations, and the military personnel;
3. It makes use of census and sampling methodologies with a part of the sample rotating each month;
4. It uses the 1970 version of the Standard Industrial Classification and the 1981 version of the Standard Geographical Classification;
5. It groups employees according to the method of payments (i.e. salaried employees, hourly-rated employees, other types of employees);
6. It produces statistics on overtime earnings and hours;
7. It aggregates data according to different mixtures of the units selected in the survey sample (i.e. all units, take-all units, take-some units).

The new survey has been designed to produce reliable estimates at the broad industry division levels for provinces, and at the "3-digit" industry level for Canada; the reliability of the estimates decreases at more disaggregated industrial or geographical levels.

More detailed information is given in "Concepts and Methods" at the end of this publication on methodology, concepts and definitions.

In order to help users in making the transition from the old to the new estimates, March 1983 data from the old surveys and from the new survey are published separately. This issue of the publication contains the estimates of the new survey. When bridging the two sets of estimates, users should consult the industrial conversion table at the end of this publication (see Annex 3).

Another special table (see Annex 2) provides estimates of the old "industrial composite" series for Canada and the provinces. These estimates will be terminated after the production of the December 1985 data.

The new estimates contained in this publication also appear in the Canadian Socio-economic Information Management System (CANSIM); the new reference matrix and series numbers are given at the end of this publication.

For further details, please contact Labour Division at (613) 995-7165.

## NOTE AUX UTILISATEURS

Depuis le mois de référence avril 1983, les estimations qui apparaissent dans cette publication remplacent celles qui étaient auparavant publiées dans les catalogues 72-002 (Emploi, gains et durée du travail) et 72-008 (Estimations du nombre de salariés par province et par industrie).

Les nouvelles estimations proviennent de l'enquête mensuelle révisée sur l'emploi, la rémunération et les heures de travail. Les caractéristiques principales de cette enquête sont les suivantes:

1. Elle regroupe des compagnies, établissements et organismes de toutes tailles;
2. Elle couvre toutes les industries sauf l'agriculture, la pêche et le piégeage, les ménages privés, les organismes religieux et les services de la défense;
3. Elle utilise un mélange de recensement et d'échantillonnage, une partie de l'échantillon étant remplacée chaque mois;
4. Elle utilise la version 1970 du manuel "Classification des activités économiques", ainsi que la version 1981 du manuel "Classification géographique type";
5. Elle regroupe les salariés selon leur mode de paiement (i.e. employés, salariés rémunérés à l'heure, autres types de salariés);
6. Elle fournit des statistiques sur la rémunération pour heures supplémentaires et sur le nombre d'heures supplémentaires;
7. Elle rassemble les données correspondant à certains regroupements des unités choisies dans l'échantillon (i.e. ensemble des unités, unités à tirage complet, unités à tirage partiel).

La nouvelle enquête a été construite de façon à fournir des estimations fiables aux niveaux agrégés des divisions industrielles pour les provinces et au niveau industriel à trois chiffres pour le Canada; la fiabilité des estimations diminue à des niveaux industriels et géographiques plus détaillés.

Vous trouverez des informations plus détaillées concernant la méthodologie, les concepts et les définitions, à la fin de cette publication, sous la rubrique "Concepts et méthodes".

Afin d'aider les utilisateurs à faire la transition entre les anciennes estimations et les nouvelles, les données de mars 1983 sont publiées pour les anciennes enquêtes et pour la nouvelle. Cette publication contient les données de la nouvelle enquête. En reliant les deux ensembles d'estimations, les utilisateurs devraient référer au tableau de conversion des industries (1960 à 1970) à la fin de cette publication (annexe 3).

Un autre tableau spécial (voir annexe 2) contient les estimations des anciennes séries "ensemble des industries" pour le Canada et les provinces. Ces estimations s'achèveront avec l'apparition des données de décembre 1985.

Les nouvelles estimations qui apparaissent dans cette publication sont également disponibles par le biais du Système canadien d'information socio-économique (CANSIM); les nouveaux numéros de référence des matrices et séries CANSIM se trouvent à la fin de cette publication.

Pour de plus amples renseignements, contactez la Division du travail au numéro (613) 995-7165.

## CONCEPTS AND METHODS

### Objectives

The Survey of Employment, Payrolls and Hours is designed to measure, on a monthly basis, the levels and month-to-month trends of employment, paid hours and earnings. These measures are compiled and published at detailed industrial and geographic levels.

All industries are covered by the survey with the exception of agriculture, fishing and trapping, private household services, religious organizations, and military services.

### Source of Data

The statistics contained in this report are based on information obtained through a mail survey of firms, institutions and organizations of all sizes.

The **firm** is defined as any business entity whether incorporated or not; it comprises sole proprietorships, partnerships, corporations and other forms of organization such as co-operatives. Most firms consist of only one "establishment" (see definition under Industrial Classification) but, in some cases, the firm is made up of a number of establishments which may or may not be engaged in the same kind of economic activity.

The universe for the survey is derived from a central file of employers maintained by the Business Register and Profiling Division of Statistics Canada.

### Industrial Classification

All **firms** are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straightforward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The **establishment** (typically a factory, mine, store or a similar unit) is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into **reporting units** which, although not capable of reporting all basic industrial statistics, can report employment, payrolls and hours data for particular locations.

## CONCEPTS ET MÉTHODES

### Objectifs

L'enquête sur l'emploi, la rémunération et les heures de travail a pour objet de mesurer mensuellement les niveaux et les tendances de l'emploi, des heures rémunérées et des gains. Ces mesures sont rassemblées et publiées à des niveaux détaillés selon l'activité économique et le lieu géographique.

L'enquête vise tous les secteurs de l'activité économique sauf l'agriculture, la pêche et le piégeage, le service domestique des ménages, les organismes religieux et les services de la défense.

### Source des données

Les statistiques présentées dans ce bulletin se fondent sur des renseignements recueillis au moyen d'une enquête postale menée auprès des entreprises et autres organismes ou établissements de toutes tailles.

Le terme **entreprise** désigne toute entité commerciale ou industrielle constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme quelconque d'organisation, telle une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité.

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu par la Division des profils et du registre des entreprises de Statistique Canada.

### Classement par activité économique

Toutes les **entreprises** appartiennent à une branche d'activité économique déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un **établissement**. À des fins statistiques, on définit l'établissement (en général une usine, une mine, un magasin ou une unité semblable) comme la plus petite unité constituant un ensemble fonctionnel distinct capable de déclarer, à l'égard de l'activité économique, tous les éléments statistiques de base qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour obtenir des statistiques géographiques détaillées, souvent on subdivise l'établissement en **unités déclarantes** qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi, la rémunération et les heures de travail relativement à certains endroits.

The industrial classification of the statistics contained in this report is based on the 1970 version of the Standard Industrial Classification. A description of the various industries and groups of industries is contained in the "Standard Industrial Classification Manual", Catalogue No. 12-501. The "S.I.C. Code" columns on the tables correspond to the codes of this manual. These tables also contain the following groupings which are not part of the "Standard Industrial Classification Manual":

- a) Industrial aggregate (031-951) represents the sum of all the industries included in the survey (see Objectives).
- b) Goods-producing industries (031-421) comprise forestry, mining, manufacturing and construction.
- c) Service-producing industries (501 to 951) consist of transportation, communication and other utilities, trade, finance, insurance and real estate, services (except for religious organizations and private households), and public administration (with the exception of military personnel, and other government services).
- d) Durable goods manufacturing (durable) includes wood industries (251-259), furniture and fixture industries (261-268), primary metal industries (291-298), metal fabricating industries except machinery and transportation equipment (301-309), machinery industries except electrical machinery (311-318), transportation equipment industries (321-329), electrical products industries (331-339), and non-metallic mineral products industries (351-359).
- e) Non-durable goods manufacturing (non-dur) is the sum of food and beverage industries (101-109), tobacco products industries (151-153), rubber and plastic products industries (162-165), leather industries (172-179), textile industries (181-189), knitting mills (231-239), clothing industries (243-249), paper and allied industries (271-274), printing, publishing and allied industries (286-289), petroleum and coal products industries (365-369), chemical and chemical products industries (372-379), and miscellaneous manufacturing industries (391-399).
- f) Building construction (404, 421) comprises building construction (404) and special-trade contractors (421).
- g) Engineering construction (406, 409) includes highway, bridge and street construction (406) and other construction (409).
- h) Education services (809T) consist of kindergartens and nursery schools (801), elementary and secondary schools (802), schools of arts and performing arts (803), vocational centers, trade schools and business colleges (804), post-secondary non-university educational institutions (805), universities and colleges (806), and education and related services (809).

Le classement des statistiques que nous présentons dans ce volume s'inspire de la Classification des activités économiques, de 1970. Vous trouverez une description de ces diverses activités et de leurs groupements dans le bulletin de la Classification des activités économiques, n° 12-501 au catalogue. Les codes C.A.É. qui apparaissent dans les colonnes de certains tableaux de notre publication correspondent au codes de ce bulletin. Les tableaux en question renferment aussi les groupes suivants, qui ne figurent pas dans la Classification des activités économiques:

- a) Ensemble des activités économiques (031-951) — Il s'agit de la somme des diverses activités économiques visées par l'enquête (voir objectifs).
- b) Branche productrice de biens (031-421) — Ce groupe englobe les forêts, les mines, les manufactures et la construction.
- c) Branche des services (501-951) — Englobe les transports, les communications et autres services publics, le commerce, les finances, assurances et affaires immobilières, les services (sauf les organismes religieux et les ménages privés), et l'administration publique (à l'exception du personnel militaire et des autres services gouvernementaux).
- d) Fabrication des biens durables (durables) — Englobe les industries du bois (251-259), l'industrie du meuble et des accessoires d'ameublement (261-268), l'industrie de première transformation des métaux (291-298), l'industrie des produits métalliques (sauf les machines et le matériel de transport) (301-309), la fabrication des machines (sauf le matériel électrique) (311-318), l'industrie du matériel de transport (321-329), l'industrie des appareils et du matériel électriques (331-339) et l'industrie des produits minéraux non métalliques (351-359).
- e) Fabrication des biens non durables (non dur.) — Englobe l'industrie des aliments et boissons (101-109), l'industrie du tabac (151-153), l'industrie du caoutchouc et des produits en matière plastique (162-165), l'industrie du cuir (172-179), l'industrie textile (181-189), la bonneterie (231-239), l'industrie de l'habillement (243-249), l'industrie du papier et des produits connexes (271-274), l'imprimerie, l'édition et industries connexes (286-289), l'industrie du pétrole, du charbon et de leurs dérivés (360-369), l'industrie chimique et des produits connexes (372-379), et les industries manufacturières diverses (391-399).
- f) Bâtiment (404, 421) — Englobe la construction de bâtiments (404) et l'activité des entrepreneurs spécialisés (421).
- g) Génie civil (406, 409) — Englobe la construction de routes, ponts et rues (406) et autres constructions (409).
- h) Enseignement et services connexes (809T) — Englobe les jardins d'enfants et écoles maternelles (801), les écoles primaires et secondaires (802), les écoles de beaux-arts (803), les centres de formation professionnelle, écoles de métiers et collèges commerciaux (804), les établissements d'enseignement postsecondaire non universitaire (805), les universités et collèges (806), et l'enseignement et services connexes (809).

- i) Public administration (909-951) contains only the establishments engaged in activities that are governmental in character and those serving as internal service agencies of the public service. Government-owned establishments primarily engaged in activities assigned to other industries are classified in those industries along with similar establishments owned by non-government bodies. Therefore, data included in this industry division do not represent the actual number of persons employed by government at any level.

- i) Administration publique (909-951) — Comprend les établissements dont les activités ont un caractère essentiellement gouvernemental, et les organismes auxiliaires assurant les services internes de l'État. Les établissements publics dont l'activité dominante relève d'autres activités économiques sont classés sous les mêmes rubriques que les établissements privés semblables. Ainsi, les données publiées pour cette division économique ne représentent pas le nombre réel de personnes employées par les différents pouvoirs publics.

## Geographic Classification

Reporting units are assigned to a province, a census division, an economic region (for the province of Quebec and Ontario) and, where applicable, to a metropolitan or urban area. The survey selected metropolitan and urban areas as delineated for the 1981 Census of Population; these areas usually consist of the urban centre as well as the surrounding territory and had a population of 25,000 inhabitants or more. The reporting units not located in a tabulated urban area or not allocated to a compiled census division are included in the provincial and national totals.

A description of the various geographical areas is contained in the "Standard Geographical Classification Manual, 1981", Catalogue No. 12-567.

## Definitions

### 1. Reference Period

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are asked to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period.

If, owing to **strikes**, unpaid holidays or other similar unpaid circumstances, the data reported are not representative of the last seven days of the month, adjustments are made to reflect the economic situation of the reference period (i.e. when a strike effects the last seven days of the survey month, the derived data will reflect the strike situation).

### 2. Employee

All persons drawing pay for services rendered or for paid absences and for whom the employer is required to complete a Revenue Canada T-4 Supplementary Form constitute employees.

## Classement géographique

On attribue les unités déclarantes à une province, à une division de recensement, à une région économique (pour les provinces suivantes: Québec et Ontario) et, s'il y a lieu, à une région métropolitaine ou urbaine. Les régions métropolitaines et urbaines choisies pour l'enquête sont celles du recensement de la population de 1981; ces régions, qui se composent habituellement d'un centre urbain et du territoire environnant, comptaient lors du dernier recensement 25,000 habitants ou plus. Les unités déclarantes situées en dehors de toute région urbaine indiquée dans les tableaux, ou non attribuées à une division de recensement prise en compte, font partie des totaux provinciaux et nationaux.

La description des diverses régions géographiques se trouve dans la "Classification géographique type, 1981", numéro 12-567 au catalogue.

## Définitions

### 1. Période de référence

En théorie, les données sur l'emploi se rapportent aux sept derniers jours du mois de référence. Dans la pratique, peu d'entreprises tiennent des registres de paye pour cette période précise; on demande donc aux répondants de faire porter leur déclaration sur la(les) dernière(s) période(s) de paye de chaque mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en divisant le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye sur laquelle porte la déclaration.

Si, en raison d'une **grève**, d'un congé non payé ou d'autres circonstances semblables, les données déclarées ne sont pas représentatives des sept derniers jours du mois, on procède aux rajustements qui s'imposent afin de traduire la situation qui régnait pendant la période de référence (cela signifie que lorsqu'une grève touche les sept derniers jours du mois d'enquête, les données qui en découlent reflètent l'état de grève).

### 2. Salarié

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada, est un salarié.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment) and casual or temporary employees (those who are hired for discontinuous periods or on an irregular basis). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensioners, home workers, members of elected or appointed bodies, persons working outside Canada, military personnel and persons providing services to an establishment on a contract basis. It also excludes persons who did not receive any pay from the employer for the entire survey reference period (e.g. persons on strike, persons on unpaid holidays, persons receiving remuneration from an insurance, Workmen's Compensation or other related fund, etc.); however, employees paid from the employer for a part of the reference period and unemployed or on strike for the rest are counted as employed.

The employees are classified into the following categories:

**a) Employees paid by the hour**

Any employee whose basic wage is expressed as an hourly rate.

**b) Salaried Employees**

Any employee whose basic remuneration is a fixed amount for a period of at least one week.

**c) Other Employees**

Those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc.

**d) Non-teaching Staff**

All employees other than teachers and academic staff, i.e. president, vice-president, librarian, registrar, bursar, accountant, guidance counsellor, laboratory technician, personnel officer, and other services (e.g. janitor, caretaker, bus driver, etc.)

**c) Teaching Staff**

Those classified as teachers, instructors or academics in the payroll records (e.g. principal, professor, dean, head of department, master, teacher, etc.) whether they teach during the day or evening. Supply or substitute teachers are excluded.

Le terme "salariés" désigne les salariés à temps plein, les salariés à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels ou temporaires (ceux qui sont embauchés de façon irrégulière ou temporaire). Il désigne aussi les propriétaires, les administrateurs, les associés et les autres dirigeants actifs des entreprises constituées en corporation.

Le concept de salarié exclut les propriétaires et les associés des entreprises non constituées en corporation et ceux des bureaux voués à l'exercice d'une profession libérale, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les retraités, les travailleurs à domicile, les membres des corps élus ou nommés, les personnes travaillant à l'extérieur du Canada, le personnel militaire et les personnes fournissant des services à un établissement sur une base forfaitaire. Sont également exclus les travailleurs n'ayant pas reçu de paye de leur employeur pendant la période de référence de l'enquête (i.e. les personnes en grève, en congé non payé, celles recevant une rémunération aux termes d'un régime d'assurance, d'une caisse d'indemnisation des accidents au travail ou d'une caisse analogue, etc.); cependant, les travailleurs rémunérés par leur employeur pour une partie de la période de référence, mais en chômage ou en grève pendant l'autre partie, sont quand même considérés comme salariés.

Les salariés sont classés dans les catégories suivantes:

**a) Salariés rémunérés à l'heure**

Tout salarié dont la rémunération de base est calculée selon un taux horaire.

**b) Employés**

Tout salarié dont la rémunération de base constitue une somme fixe versée pour une période d'au moins une semaine.

**c) Autres salariés**

Tout salarié dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de trajet, etc.

**d) Personnel non enseignant**

Tous les salariés autres que le personnel enseignant, c'est-à-dire le président, le vice-président, le bibliothécaire, le secrétaire général, l'économe, le comptable, les orienteurs, les techniciens de laboratoire, les agents du personnel, le concierge, les chauffeurs d'autobus, etc.

**e) Personnel enseignant**

Tout travailleur classé comme enseignant ou chargé de cours dans les dossiers du service de la paye (directeur professeurs, doyens, chefs de département, maîtres, enseignants, etc.), qu'il enseigne le jour ou le soir. Les suppléants ou remplaçants sont exclus.

f) **Supply or Substitute Teachers**

Teachers who are called in to teach whenever their services are needed either to augment the existing staff or as a short-term replacement for a full-time or part-time teacher.

3. **Earnings**

Earnings represent gross pay before deductions for taxes, unemployment insurance contributions, etc.

The payroll concept does not include supplementary labour costs such as employer's contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or director's fees.

a) **Gross Pay**

Gross pay includes salaries, straight-time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week.

b) **Overtime Pay**

All pay received for the number of hours worked in excess of the standard workday or workweek.

4. **Hours**

a) **Total hours paid**

All hours worked, including overtime hours, **plus** hours of paid absence (e.g. holidays, vacation, sick leave, jury duty, etc.)

b) **Overtime Hours**

The total hours for which overtime was paid. These represent the hours worked.

5. **Paid Absence**

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

f) **Suppléants ou remplaçants**

Enseignants appelés à se présenter au travail lorsqu'on a besoin de leurs services soit pour accroître le personnel existant, soit pour remplacer pendant une courte période un enseignant à temps plein ou à temps partiel.

3. **Gains**

Les gains représentent la rémunération brute avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc.

Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents, ni les jetons de présence des administrateurs.

a) **Rémunération brute**

Comprend les salaires, les traitements à taux ordinaires, la rémunération du travail à la pièce et les commissions régulières, ainsi que les primes, indemnités de vie chère et autres gratifications versées régulièrement, les payes de surtemps **et** la rémunération des absences payées dans la semaine de référence de l'enquête.

b) **Rémunération du surtemps**

Ensemble de la rémunération versée pour le nombre d'heures de travail effectuées en sus de la journée ou de la semaine normale de travail.

4. **Heures**

a) **Nombre total d'heures payées**

Ensemble des heures travaillées, y compris les heures supplémentaires, **plus** les heures de congé (par ex., les jours fériés, les vacances, les congés de maladie, les congés pour service judiciaire, etc.)

b) **Heures de surtemps**

Total des heures payées à un taux majoré; il s'agit d'heures réellement travaillées.

5. **Absence payée**

Les absences payées comprennent toutes les heures rémunérées dans le cas des jours fériés payés, des vacances, des congés de maladie, ainsi que des congés d'accident du travail et des congés pour motifs personnels tels que les congés de deuil et les congés pour service judiciaire.

## 6. Standard Workweek

The hours in the standard workweek constitute the average number of hours of work normally scheduled in a workweek.

## 7. Take-all and Take-some Units

Take-all units are those reporting units which are included in the survey sample with certainty every month. These include:

- a) All units having 200 or more employees;
- b) All units of "firms" with more than one reporting unit;
- c) Units which report their survey data on computer listings rather than on the standard questionnaire;
- d) Units of government departments and crown corporations;
- e) Units belonging to elementary and secondary schools;
- f) Certain other pre-specified units.

Take-some units are all the other units in the universe which have a known probability of selection.

## Methodology

The statistics contained in this publication are based on information obtained through a sample survey of reporting units. The data is collected by means of questionnaires mailed monthly to a sample of about 70,000 reporting units selected out of a universe of about 700,000. The sample covers all industries in scope for the survey, all provinces and territories and all sizes of units. Both the universe and the sample are updated monthly for births and deaths.

## Stratification

For the determination of the survey sample size and for the purpose of the sample selection, the universe of reporting units is stratified by 12 provinces and territories, 16 industry groups and 4 size groups. (An industry group is slightly more detailed than the 1-digit industry code). The size of a unit is defined to be the total number of paid employees in that unit. The four size groups are 0 to 19, 20 to 49, 50 to 199 and 200 or more employees.

The universe of reporting units is further stratified into **take-all** and **take-some** categories as defined earlier under Definitions.

## 6. Semaine normale de travail

Les heures d'une semaine normale de travail reflètent la moyenne des heures de travail normalement fixées pour une semaine.

## 7. Unités à tirage complet et à tirage partiel

Les unités à tirage complet sont les unités déclarantes incluses en permanence dans l'échantillon de l'enquête. Elles comprennent:

- a) toutes les unités de 200 salariés ou plus;
- b) toutes les unités des "entreprises" possédant plus d'une unité déclarante;
- c) les unités qui déclarent leurs données au moyen d'un imprimé d'ordinateur plutôt qu'à l'aide du questionnaire;
- d) unités des services gouvernementaux et des sociétés de la couronne;
- e) unités propres aux écoles primaires et secondaires;
- f) d'autres unités préalablement choisies.

Les unités à tirage partiel sont toutes les autres unités qui ont une probabilité connue de ne pas être choisies dans l'échantillon de l'enquête. Lorsqu'elles sont choisies, de telles unités sortent de l'enquête après un certain nombre de mois.

## Méthodologie

Les statistiques présentées dans cette publication se fondent sur les résultats d'une enquête effectuée par sondage auprès d'unités déclarantes. Les données sont recueillies au moyen d'un questionnaire posté tous les mois à un échantillon de quelque 70,000 unités déclarantes provenant d'un univers d'environ 700,000 unités. L'échantillon couvre toutes les activités économiques que vise l'enquête, ainsi que les toutes les provinces et les territoires et toutes les tailles d'unité. Chaque mois, nous mettons à jour l'univers ainsi que l'échantillon, en tenant compte des créations et des disparitions d'unités ou d'entreprises.

## Stratification

Pour déterminer la taille et la composition de l'échantillon, nous répartissons l'univers des unités déclarantes en 12 provinces et territoires, 16 groupes industriels (activités économiques, et quatre groupes de taille. (Un groupe industriel est légèrement plus détaillé qu'une industrie dont le code n'a qu'un chiffre). La taille d'une unité se définit comme étant le nombre total de salariés rémunérés que compte cette unité. Les quatre groupes de taille sont 0 à 19, 20 à 49, 50 à 199 et 200 salariés et plus.

En outre, l'univers des unités déclarantes est stratifié en deux catégories: les unités à **tirage complet** et les unités à **tirage partiel**, au sens que nous avons précisé dans la section "Définitions".

## Sample allocation and selection

The size of the take-some sample for the survey has been determined so as to provide estimates of total number of paid employees at the industry group and province level with a prespecified reliability. The determination has been done under the requirement that the sample at the industry group and province level is allocated to each size group in proportion to the total estimated take-some employment in that size group. If the sampling fraction resulting from this allocation is less than .01, then a minimum sampling fraction of .01 is adopted in order to avoid unusually large weights. The allocation makes the probability of inclusion of a unit in the sample in a size stratum approximately proportional to the average number of employees per unit in that size stratum. The sample design, therefore, provides for a small sample of small reporting units if the concentration of employment is mainly in the large reporting units. On the other hand, if the proportion of total employment from small reporting units is substantial, then the sample will include a large number of small reporting units.

The number of reporting units to be selected at the industry group, province and size levels is again allocated to each three-digit industry within that industry group, province and size in proportion to the total number of reporting units in that three-digit industry. In other words, the sampling fraction used at the three-digit industry level is the same as the one determined at the industry group, province and size. However, it should be noted that a minimum sample of three units is selected whenever the use of the sampling fraction results in less than 3 units. If the universe itself is less than three units, then all the units are taken into the sample.

A systematic sample of the predetermined number of units is drawn from the take-some universe in every three-digit industry, province and size group. The total sample is the sum of the number of take-all and selected take-some units.

## Sample rotation

The design provides for rotation of the take-some sample within a three-digit industry, province and size group. Each month, approximately one-twelfth of the take-some sample is replaced. This means that units generally remain in the sample for 12 months before rotating out. The units are not eligible for reselection for at least 12 months after they rotate out.

In some small three-digit industry, province and size group cells it may not be possible to rotate out units each month. Consequently, in some small cells, units may have to stay longer than 12 months.

## Répartition et choix de l'échantillon

La taille de la portion à tirage partiel de l'échantillon a été déterminée de façon à fournir, avec une fiabilité prédéterminée, des estimations du nombre total de salariés rémunérés, au niveau du groupe industriel et de la province. Ce calcul tient compte du fait que l'échantillon, au niveau du groupe industriel et de la province, doit être réparti dans chaque groupe de taille proportionnellement à l'estimation de l'emploi total au sein de la portion à tirage partiel de chacun des groupes de taille. Si la fraction d'échantillon résultant de cette répartition est inférieure à 0.01, on la remplace alors par la fraction minimale 0.01 afin d'éviter toute pondération excessive. La répartition est telle que la probabilité qu'une unité entre dans une strate particulière de l'échantillon est à peu près proportionnelle au nombre moyen de salariés par unité comprise dans cette strate. Le plan d'échantillonnage prévoit donc un petit échantillon de petites unités déclarantes lorsque l'emploi se concentre principalement dans les grandes unités déclarantes. Par contre, si l'emploi total provenant des petites unités déclarantes est élevé, alors l'échantillon contiendra un grand nombre de petites unités déclarantes.

Le nombre d'unités qu'il faut choisir au niveau du groupe industriel, de la province et de la taille est, en outre, réparti entre chacune des industries ayant un code à trois chiffres, lesquelles font partie du groupe industriel, de la province et de la taille considérés; cette répartition se fait proportionnellement au nombre total d'unités déclarantes comprises dans l'industrie dont le code comporte trois chiffres. En d'autres termes, la fraction d'échantillon utilisée au niveau industriel à trois chiffres est la même que celle déterminée pour le groupe industriel, la province et la taille. Il faut cependant noter que l'échantillon minimal est de trois unités, peu importe le résultat obtenu en utilisant la fraction d'échantillon. S'il y a moins de trois unités dans l'univers, toutes les unités disponibles sont incluses dans l'échantillon.

Au sein de la portion à tirage partiel, on choisit un échantillon systématique d'un nombre prédéterminé d'unités dans chaque industrie ayant un code à trois chiffres, et ce dans chaque province et chaque groupe de taille. L'échantillon total résulte de la somme du nombre d'unités à tirage complet et du nombre d'unités à tirage partiel sélectionnées.

## Rotation de l'échantillon

Pour chaque industrie (code à trois chiffres), province et groupe de taille, le plan prévoit une rotation de la portion à tirage partiel de l'échantillon. Chaque mois, le douzième environ de la portion à tirage partiel de l'échantillon est remplacé. Cela signifie qu'en général les unités demeurent 12 mois dans l'échantillon avant d'en sortir par voie de rotation. Les unités ne peuvent pas être choisies de nouveau avant au moins 12 mois suivant leur mois de sortie.

Dans le cas de certaines petites cellules (une cellule regroupe les unités de même industrie au niveau du code à trois chiffres, même province et même groupe de taille), il est parfois impossible d'assurer la rotation des unités chaque mois. Ainsi, il peut arriver que des unités demeurent plus de douze mois dans certaines petites cellules.

## Data edit and correction

All the questionnaires are initially screened for completeness by the interviewers of the Statistics Canada regional offices. Thereafter, extensive computer edit procedures for accuracy and consistency are performed at the Ottawa head office. As a result of any of the above-mentioned editing techniques, the respondent may be contacted to confirm or explain the data.

The edit procedures include the comparison of the values of key characteristics (e.g. number of employees, hours worked, salary per employee, etc.) reported for consecutive months by the same unit in order to detect large changes or errors in reporting. Whenever there is a large change or the data appears inconsistent, the record is signaled by the computer edit for review and is subject to correction or acceptance as appropriate.

## Follow-up

Reporting units which are non-respondents to the initial mailing are followed up by telephone by the staff of the regional offices of Statistics Canada. Priority for this follow-up is given to (i) units which are in the sample for the first time and which have not responded, (ii) units which have not responded for two consecutive months, (iii) large nonrespondent units. Follow-up also takes into account response rates and employment in the various industry groups in determining priority.

If units continue to be non-respondents even after follow-up, then data will be imputed for these units. All the records with imputed values are subject to the edits mentioned above.

## Imputation

Imputation for nonrespondent units which have been in the survey for more than one month is based on the ratio of the monthly changes. The ratio of the monthly change for each characteristic is calculated from units that responded both in the current and the previous month and is applied to the previous month's data of each nonrespondent.

For the nonresponding units that are new to the survey, imputation is based on other sources of information such as the employment intention of the unit, the characteristics of the responding units in the same industry group, province and size.

## Estimates

The basic "building block" for producing the monthly estimates is the three-digit industry, province and size group. Estimates at higher levels are obtained by the aggregation of the above estimates. Estimates of averages are obtained by first estimating the totals for the numerator and the denominator at the desired level and then calculating the ratio. Estimates for certain sub-provincial areas are also produced, treating the sub-

## Vérification des données et correction

Au départ, les interviewers des bureaux régionaux de Statistique Canada s'assurent que tous les questionnaires sont complets. Ultérieurement, le personnel du bureau d'Ottawa vérifie par ordinateur l'exactitude et la cohérence des chiffres déclarés. À chacune de ces deux étapes de vérification, un répondant peut donc être prié de confirmer ou d'expliquer ses chiffres.

Nos procédés de vérification nous permettent de comparer les valeurs de certaines caractéristiques (nombre de salariés, heures de travail, gains par salarié, etc.) déclarées par la même unité plusieurs mois de suite. Ainsi, il est possible de déceler les grandes variations ou les erreurs, s'il en est. Chaque fois qu'une forte variation apparaît ou que les données semblent incohérentes, l'ordinateur signale le cas, et l'enregistrement est aussitôt corrigé s'il comporte effectivement une erreur.

## Méthode de suivi

Le personnel des bureaux régionaux de Statistique Canada relance par téléphone les unités déclarantes qui tardent à répondre au questionnaire. Cette méthode de suivi s'adresse en priorité (i) aux unités qui font partie de l'échantillon pour la première fois et qui n'ont pas encore répondu; (ii) aux unités qui accusent un retard de deux mois consécutifs; (iii) aux grandes unités non répondantes. Pour déterminer l'ordre de priorité des suivis, on tient compte des taux de réponse et du volume de l'emploi dans les différents groupes industriels.

Lorsque des unités persistent à ne pas répondre même après le suivi, des données leurs sont imputées. Tous les enregistrements dont les données découlent d'une imputation sont soumis aux vérifications mentionnées ci-dessus.

## Imputation

L'imputation de données aux unités non répondantes comprises dans le champ de l'enquête depuis plus d'un mois est basée sur le ratio des variations mensuelles de ces unités. Le ratio de la variation mensuelle d'une caractéristique se calcule à partir des unités qui ont répondu pour le mois courant et le mois précédent, et s'applique aux données du mois précédent de chaque unité non répondante.

Dans le cas des unités non répondantes qui figurent dans l'enquête pour la première fois, l'imputation se fonde sur d'autres sources d'information telles que les prévisions d'emploi de l'unité et les caractéristiques des unités déclarantes du même groupe industriel, de la même province et de la même taille.

## Estimations

L'élément de base qui sert à établir les estimations est l'industrie (code à trois chiffres), la province et la taille. Les estimations plus agrégatives sont obtenues par la sommation des estimations susdites. Pour calculer les moyennes, on estime d'abord les totaux du numérateur et ceux du dénominateur, au niveau désiré, puis on en fixe le ratio. Nous produisons aussi des estimations concernant certaines régions infraprovinciales, considérant chacune de ces régions comme un domaine. Enfin, nous

province as a domain. Coefficients of variation for estimates of some key characteristics at all levels are also produced.

Provision has also been made in the estimation procedure to change the weights of "unusually large" observations occurring in size groups 1, 2 and 3. These observations are termed "outliers" and are judged not to be representative of other units in that size group. The weights of the remaining units are adjusted accordingly.

### Reliability of the estimates

There are two types of errors possible in estimates based on a sample survey: sampling and non-sampling.

**Sampling errors** occur because observations are made only on a sample rather than on the entire universe. Estimates based on a sample differ from the figures that would have been obtained if a complete census had been taken using the same questionnaires, instructions, interviewers and processing techniques. This difference with respect to a particular estimate is called the sampling error of the estimate.

**Non-sampling errors** are errors which are not related to sampling and may occur in a survey operation for many reasons. Non-response, coverage and classification errors, differences in the interpretation of the questions, incorrect information from respondents, mistakes in recording, coding and processing of data are examples of non-sampling errors. It should be noted that non-sampling errors also occur in complete censuses. In the Survey of Employment, Payrolls and Hours, efforts to reduce non-sampling errors include careful design of questionnaires, editing of data, follow-up of and imputation for non-respondents and thorough control of processing operations.

### Indicators of sampling error

The sampling error, as described above, is not known. However, it can be estimated from the sample itself by using a statistical measure called the **standard error** of a survey estimate. When the standard error is expressed as a percent of the estimate, it is known as the relative standard error or coefficient of variation.

Alphabetic symbols of the coefficient of variation are used in this publication (see Tables A to F at the end of this explanatory note) to give an indication of the reliability of the estimates and are based on a 12-month average of the coefficients of variation. The ranges of the coefficients of variation and their corresponding alphabetic indicator are given in the following table.

calculons des coefficients de variation pour les estimations de certaines caractéristiques clés, à tous les niveaux.

Le procédé d'estimation comporte en outre des mécanismes qui permettent de changer les poids lorsque des observations "exceptionnellement grandes" apparaissent chez les unités des groupes de taille 1, 2 ou 3. Ces observations, dites "aberrantes", ne sont pas représentatives des autres unités du même groupe de taille, de sorte que l'on rajuste les poids des autres unités en conséquence.

### Fiabilité des estimations

En ce qui concerne les estimations basées sur un sondage, il existe deux types d'erreurs possibles, soit les erreurs d'échantillonnage et les erreurs non liées à l'échantillonnage.

Les **erreurs d'échantillonnage** proviennent de ce que les observations se font à partir d'un échantillon au lieu de l'univers complet. Les estimations basées sur un échantillon diffèrent des statistiques que l'on obtiendrait d'un recensement complet effectué au moyen des mêmes questionnaires, des mêmes directives, des mêmes interviewers et des mêmes techniques de traitement. Cette différence, lorsqu'il s'agit d'une estimation particulière, s'appelle erreur d'échantillonnage de l'estimation.

Les **erreurs non dues à l'échantillonnage** ne se rattachent pas à l'échantillon et peuvent se produire tout au long d'une enquête pour plusieurs raisons. Les cas de non-réponse, les anomalies de couverture et de classification, les différences d'interprétation des questions, la communication de renseignements inexacts par les répondants et les fautes d'entrée, de codage et de traitement des données sont autant d'erreurs non attribuables à l'échantillonnage. Il faut noter que des erreurs de ce genre peuvent aussi se produire dans les recensements. Pour l'enquête sur l'emploi, la rémunération et les heures de travail, nous avons tenté d'en réduire le risque par une formulation soignée des questionnaires, par une vérification rigoureuse des chiffres déclarés, par le travail de suivi, par l'imputation de données aux unités non répondantes et par un contrôle attentif des techniques de traitement.

### Indicateurs des erreurs d'échantillonnage

L'erreur d'échantillonnage que nous venons de décrire reste inconnue. On peut cependant l'estimer à partir de l'échantillon, en utilisant une mesure appelée **écart-type** d'une estimation de sondage. Lorsque l'écart-type est exprimé en pourcentage de l'estimation, on l'appelle écart-type relatif ou coefficient de variation.

Dans la présente publication, nous utilisons des symboles littéraux de coefficient de variation (voir tableaux A à F à la fin de cette note explicative), pour indiquer le degré de fiabilité des estimations; cette symbolisation repose sur la moyenne des coefficients de variation de 12 mois. Les intervalles de confiance des coefficients de variation et les symboles correspondants sont précisés dans le tableau suivant.

## ALPHABETIC INDICATORS OF COEFFICIENT OF VARIATION

Alphabetic Indicator	Range of Coefficient of Variation Percent
A	0 - 1.0
B	1.1 - 2.5
C	2.6 - 5.0
D	5.1 - 10.0
E	10.1 - 15.0
F	15.1 - 25.0
G	> 25.0

The sample estimate and its standard error (derived from the coefficient of variation) may be used to construct an interval within which the unknown census value is expected to be contained with a prescribed confidence. The particular sample used in this survey is one of a large number of all possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. If intervals from two standard errors below the estimate to two standard errors above the estimate are constructed using each of the above estimates, then approximately 19 out of 20 of the intervals would include the census value. Such an interval is called a 95 percent confidence interval. For example, let the estimate under consideration be the total number of paid employees at Canada level in Construction and say it is 450,000 employees. If the estimate has a reliability indicator A, then assuming that the coefficient of variation of the estimate is 1%, the standard error of the estimate would be 4,500 employees. Therefore, in this case, one can say with 95% confidence that the census value of total paid employees in Construction is included in the interval 441,000 to 459,000 employees.

In general, the estimates of monthly changes are expected to be more reliable than the estimates of levels due to the large overlap of reporting units in the monthly samples and the high correlation between the reported values for two consecutive months.

## Statistical Presentation

### 1. Data Revision

Each month, statistics for the two latest months are prepared from the survey of Employment, Payrolls and Hours. Data for the most current month are titled **preliminary** estimates and are based on a response rate of around 80%. Estimates are also prepared for the month immediately preceding the most current month; these are known as **revised** estimates and are based on a higher rate of response (approximately 90%).

## INDICATEURS LITTÉRAUX DU COEFFICIENT DE VARIATION

Indicateur littéral	Intervalle de confiance du coefficient de variation en pourcentage
A	0 - 1.0
B	1.1 - 2.5
C	2.6 - 5.0
D	5.1 - 10.0
E	10.1 - 15.0
F	15.1 - 25.0
G	> 25.0

L'estimation de l'échantillon et son écart-type (établi d'après le coefficient de variation) peuvent servir à construire un intervalle à l'intérieur duquel s'inscrira, sous réserve d'une limite de confiance prédéterminée, la valeur inconnue que l'on obtiendrait par recensement. L'échantillon sur lequel s'appuie notre enquête n'est qu'un des multiples fragments de même taille que nous aurions pu choisir en utilisant le même plan. Les estimations tirées d'autres échantillons du même univers diffèrent les unes des autres. Si l'on construisait des intervalles allant de deux écarts-types sous l'estimation à deux écarts-types au-dessus de l'estimation, en utilisant chacune des estimations possibles (selon l'échantillon choisi), environ 19 intervalles sur 20 contiendraient alors la valeur que donnerait un recensement. Ce genre d'intervalle se nomme intervalle de confiance à 95%. Prenons par exemple comme estimation le nombre total de salariés de la construction pour l'ensemble du Canada, et supposons que ce nombre soit 450,000. Si l'indicateur de fiabilité de cette estimation est A, et si son coefficient de variation s'établit à 1%, alors l'écart-type de l'estimation sera de 4,500 salariés. Dans ce cas, on peut donc dire avec 95% de confiance que le nombre total de salariés de la construction, obtenu par recensement, se situe dans l'intervalle 441,000 à 459,000 salariés.

En général, on s'attend à ce que les estimations des variations mensuelles soient plus fiables que les estimations de niveaux, par suite de l'ample chevauchement des unités déclarantes au sein des échantillons mensuels, et de la forte corrélation qui existe entre les valeurs déclarées pour deux mois consécutifs.

## Présentation statistique

### 1. Révision des données

Chaque mois, nous préparons, à l'égard des deux derniers mois, des statistiques tirées de l'enquête sur l'emploi, la rémunération et les heures de travail. Les données du mois le plus récent sont appelées estimations **préliminaires** et se fondent sur un taux de réponse d'environ 80%. Nous établissons également des estimations pour le mois qui précède le mois le plus récent; il s'agit d'estimations **révisées** qui prennent appui sur un taux de réponse plus élevé (environ 90%).

## 2. Data Release

As soon as the estimates become available, selected highly aggregated statistics are released in the Statistics Canada Daily, while detailed data are entered in the Canadian Socio-Economic Information Management System (i.e. CANSIM).

Detailed estimates appear in this report at a later date.

## 3. Rounding

Totals and averages for any level of geographical or industrial aggregation are calculated using unrounded figures and then rounded using the usual procedure adopted by Statistics Canada. Published employment figures are rounded to hundreds. The sum of individually rounded items may not always equal the total.

## 4. Averages

The average weekly earnings (including overtime) is obtained by dividing the total weekly payrolls by the number of employees. It is calculated for the total number of employees, for the hourly-rated employees, for the salaried employees, and for the other types of employees.

The average weekly overtime earnings is derived by dividing the overtime weekly payrolls by the number of employees. It is calculated for the total number of employees, the hourly-rated employees and the salaried employees.

The average hourly earnings (including overtime) is obtained by dividing the total weekly payrolls by the total weekly number of hours (the total weekly number of hours is reported for the hourly-rated employees while, for salaried employees, it is derived by multiplying the average standard workweek hours by the number of salaried employees). It is calculated for the hourly-rated employees and for the salaried employees.

The average hourly overtime earnings is calculated for the hourly-rated employees by dividing the overtime weekly payrolls by the weekly number of overtime hours reported for this group of employees.

The average weekly hours (including overtime) is obtained by dividing the total weekly number of hours by the number of employees. This statistic is calculated for the hourly-rated employees and the salaried employees.

The average weekly overtime hours is derived by dividing the weekly number of overtime hours by the number of employees. This average is calculated for the hourly-rated employees.

## 2. Diffusion des données

Dès que les estimations requises sont disponibles, des statistiques choisies à un niveau d'agrégation élevé paraissent dans le Quotidien de Statistique Canada, tandis que les chiffres détaillés sont introduits dans le Système canadien d'information socio-économique (CANSIM).

Les estimations détaillées apparaissent dans ce bulletin plus tard.

## 3. Arrondissement

Les totaux et les moyennes des divers niveaux d'agrégation géographique ou industrielle sont calculés au moyen des chiffres bruts, ensuite arrondis conformément à la méthode d'arrondissement habituelle de Statistique Canada. Les nombres publiés concernant l'emploi sont arrondis à la centaine. Par conséquent, il peut arriver que la somme des chiffres arrondis individuellement ne corresponde pas au total.

## 4. Moyennes

On obtient les rémunérations hebdomadaires moyennes (y compris celles du surtemps) en divisant les rémunérations hebdomadaires totales par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure, d'employés et des autres catégories de salariés.

Pour obtenir les rémunérations hebdomadaires moyennes du surtemps, on divise les rémunérations hebdomadaires du surtemps par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure et d'employés.

On obtient les gains horaires moyens (y compris la rémunération du surtemps) en divisant les rémunérations hebdomadaires totales par le nombre total hebdomadaire d'heures travaillées (le nombre total d'heures hebdomadaires est celui déclaré pour les salariés rémunérés à l'heure, tandis que dans le cas des employés on l'établit en multipliant la moyenne des heures fournies pendant la semaine normale de travail par le nombre d'employés). Nous calculons cette statistique à l'égard des salariés rémunérés à l'heure et des employés.

Quant au surtemps, on calcule les gains horaires moyens des salariés rémunérés à l'heure en divisant les rémunérations hebdomadaires du surtemps par le nombre d'heures hebdomadaires de surtemps déclarées pour ce groupe de salariés.

Pour déterminer les heures hebdomadaires moyennes (y compris le surtemps) on divise le total des heures hebdomadaires par le nombre de salariés. Cette statistique est établie à l'égard des salariés rémunérés à l'heure ainsi qu'à l'égard des employés.

Pour calculer les heures supplémentaires moyennes hebdomadaires on divise le nombre d'heures supplémentaires hebdomadaires par le nombre de salariés.

The average weekly earnings (excluding overtime) is obtained by dividing the weekly payrolls, which exclude the overtime weekly payrolls, by the number of employees. This estimate is calculated for hourly-rated employees and salaried employees.

## 5. Unpublished Data

A large number of non-confidential detailed industrial and geographic estimates are compiled but not included in this report. Although the reliability of these estimates is lower than the reliability of the published estimates, these data will be available on request.

In addition to the total number of employees for the education industry, data are also available for the teaching and non-teaching staff separately.

## 6. CANSIM

Data published in this report are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System).

Tables giving the CANSIM matrix numbers, the CANSIM series numbers and the types of survey estimates are presented at the end of this explanatory text (see Tables I to V) to provide the user with an easy and quick link to the CANSIM system.

Generally speaking, the CANSIM matrix number identifies a type of survey estimates for a particular geographic area, while the CANSIM series number represents an industrial level. Owing to the different types of data aggregations (all units, take-all units, take-some units) and to the large number of survey estimate types (number of employees, average hourly earnings of hourly-rated employees, etc.), the user will have to follow the steps given hereafter to select the proper CANSIM matrix and series numbers.

- a) Determine the type of tabulated information needed (this will define the value of "x" for the CANSIM series number of Table II):

- i) Aggregation of all survey units has the value 1,
- ii) Aggregation of take-all units has the value 2 and
- iii) Aggregation of take-some units has the value 3.

- b) Determine the type of survey estimates required; this will provide the value of "y" for the CANSIM series number. This value is obtained by consulting Table I which lists the 20 types of survey estimates; the number of salaried employees, for example, constitutes type 2.

La moyenne des rémunérations hebdomadaires (surtemps exclu) s'obtient en divisant les rémunérations hebdomadaires, qui excluent les rémunérations hebdomadaires du surtemps, par le nombre de salariés. Cette estimation est calculée à l'égard des salariés rémunérés à l'heure, de même qu'à l'égard des employés.

## 5. Données non publiées

Nous établissons, aux niveaux industriel et géographique, un grand nombre d'estimations non confidentielles détaillées qui, toutefois, ne figurent pas dans le présent ouvrage. Bien que leur fiabilité soit plus faible que celle des estimations publiées, ces données peuvent être obtenues sur demande.

Outre le chiffre total des salariés du domaine de l'éducation, nous pouvons aussi fournir des données distinctes concernant le personnel enseignant et le personnel non enseignant.

## 6. CANSIM

Les données qui apparaissent dans la présente publication sont également disponibles sous une forme ordiolingue dans CANSIM (Système canadien d'information socio-économique).

Les intéressés trouveront à la fin de ces notes explicatives des tableaux indiquant les numéros des matrices CANSIM, les numéros des séries CANSIM et les types d'estimations de l'enquête (voir tableaux I à V). Ces tableaux fournissent à l'utilisateur un moyen d'accès facile et rapide au système CANSIM.

De façon générale, le numéro de matrice CANSIM désigne un type d'estimation de l'enquête pour une région géographique particulière, tandis qu'un numéro de série CANSIM désigne un niveau industriel. En raison de la multiplicité des types d'agrégation (ensemble des unités, unités à tirage complet, unités à tirage partiel) et des nombreux types d'estimations de l'enquête (nombre de salariés, salaires horaires moyens des salariés rémunérés à l'heure, etc.), l'utilisateur devra franchir les étapes suivantes pour choisir les bons numéros de matrice et de série CANSIM.

- a) Déterminer le type désiré de totalisation parmi les cas suivants (cette opération définira la valeur de "x" pour le numéro de série CANSIM au tableau II):

- i) ensemble des unités de l'enquête: vaut 1,
- ii) unités à tirage complet: vaut 2 et
- iii) unités à tirage partiel: vaut 3.

- b) Déterminer le type requis d'estimations de l'enquête; cette opération fixera la valeur de "y" pour le numéro de série CANSIM. On obtient cette valeur en consultant le tableau I, qui contient la liste des 20 types d'estimations de l'enquête; le type "employés", par exemple, a la valeur 2.

- c) Determine the industrial level needed and refer to the Industry Code column of the CANSIM series number Table II to find the rest of the series number (e.g. Industry Code 031 has series number **x.y.1.1.1.1**).
- d) Determine the geographical level required and refer to the CANSIM matrix number tables (Tables III to V) to select the appropriate matrix number.

A specific example would be as follows. The "average weekly overtime earnings of salaried employees" for "all survey units" is needed for the Ontario total manufacturing. The CANSIM series number will be 1.13.1.1.3 according to:

- i) The "x" value of 1 for the "All survey units" aggregation,
- ii) The "y" value of 13 for the type of survey estimates and
- iii) The tail-end of the series number 1.1.3 for the manufacturing Industry Code 101-399.

The CANSIM matrix number will be 8375 because the type of estimates 13 is required for Ontario.

It should be noted that only two types of survey estimates are available for the Census Agglomerations (i.e. estimates 01: total number of employees, and 05: average weekly earnings (including overtime) of all employees), while twenty types of estimates are available for Canada, the provinces and the Census Metropolitan Areas.

For further information on CANSIM call (613) 995-7406 or write CANSIM Division, Statistics Canada, R.H. Coats BLDG., Ottawa, Ontario, K1A 0T6.

## 7. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

- c) Déterminer le niveau industriel désiré et utiliser la colonne "code des industries" du tableau II des numéros de série CANSIM pour trouver les autres chiffres du numéro de série (par ex. le code d'industrie 031 possède le numéro de série **x.y.1.1.1.1**).
- d) Déterminer le niveau géographique requis et utiliser les tableaux de numéros de matrice CANSIM (Tableaux III à V) pour choisir le numéro de matrice approprié.

Voici un exemple. Supposons que l'on veuille connaître la "rémunération hebdomadaire moyenne du surtemps des employés" de "l'ensemble des unités de l'enquête" pour les manufactures de l'Ontario. Le numéro de série CANSIM sera 1.13.1.1.3, puisque:

- i) la valeur de "x" pour le groupe "ensemble des unités de l'enquête" est 1,
- ii) la valeur de "y" pour le type d'estimation est 13, et
- iii) la fin du numéro de série pour le "code d'industrie" des manufactures 101-399 est 1.1.3.

Le numéro de matrice CANSIM sera 8375, car le type d'estimation 13 s'applique à l'Ontario.

Notons qu'il n'existe que deux types d'estimations au niveau des agglomérations de recensement (i.e. les estimations 01: nombre total des salariés, et 05: salaires hebdomadaires moyens (y compris le surtemps) pour l'ensemble des salariés), alors qu'il y a vingt types d'estimations disponibles aux niveaux du Canada, des provinces et des régions métropolitaines.

Pour de plus amples informations concernant CANSIM, téléphoner à (613) 995-7406 ou écrire à Division CANSIM, Statistique Canada, immeuble R.H. Coats, Ottawa, Ontario, K1A 0T6.

## 7. Confidentialité

Les données du présent bulletin sont vérifiées afin de s'assurer qu'elles respectent le caractère confidentiel des réponses fournies par les entreprises.

TABLE I. Type of Estimates

TABLEAU I. Type d'estimations

Estimates Estimations	Description
1	All employees - Ensemble des salariés
2	Salaried employees - Employés
3	Employees paid by the hour - Salariés rémunérés à l'heure
4	Other employees - Autres salariés
5	Average weekly earnings (including overtime) of all employees - Rémunération hebdomadaire moyenne (incluant le surtemps) de l'ensemble des salariés
6	Average weekly earnings (including overtime) of salaried employees - Rémunération hebdomadaire moyenne (incluant le surtemps) des employés
7	Average weekly earnings (including overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (incluant le surtemps) des salariés rémunérés à l'heure
8	Average weekly earnings (including overtime) of other employees - Rémunération hebdomadaire moyenne (incluant le surtemps) des autres salariés
9	Average weekly earnings (excluding overtime) of all employees - Rémunération hebdomadaire moyenne (excluant le surtemps) de l'ensemble des salariés
10	Average weekly earnings (excluding overtime) of salaried employees - Rémunération hebdomadaire moyenne (excluant le surtemps) des employés
11	Average weekly earnings (excluding overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (excluant le surtemps) des salariés rémunérés à l'heure
12	Average weekly overtime earnings of all employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, ensemble des salariés
13	Average weekly overtime earnings of salaried employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, des employés
14	Average weekly overtime earnings of employees paid by the hour - Rémunération hebdomadaire moyenne pour travail supplémentaire des salariés rémunérés à l'heure
15	Average weekly hours of salaried employees - Heures hebdomadaires moyennes des employés
16	Average weekly hours of employees paid by the hour - Heures hebdomadaires moyennes des salariés rémunérés à l'heure
17	Average weekly overtime hours of employees paid by the hour - Heures supplémentaires hebdomadaires moyennes des salariés rémunérés à l'heure
18	Average hourly earnings of salaried employees - Rémunération horaire moyenne des employés
19	Average hourly earnings (including overtime) of employees paid by the hour - Rémunération horaire moyenne (incluant le surtemps) des salariés rémunérés à l'heure
20	Average hourly overtime earnings of employees paid by the hour - Rémunération horaire moyenne du travail supplémentaire, des salariés rémunérés à l'heure

## ANNEX 2

### "INDUSTRIAL COMPOSITE" ESTIMATES

For data produced on employment, payrolls, and hours prior to April 1983, there was an aggregate entitled "Industrial Composite". This covered all sectors except agriculture, government, defence, hospitals, schools, religion, household services, and fishing, trapping and hunting; in addition, only firms with 20 or more employees were surveyed. Therefore, neither employment nor average weekly earnings for the Industrial Composite were ever intended to be global measures.

With the beginning of the Survey of Employment, Payrolls and Hours (SEPH) in April 1983, the Industrial Composite classification ceased to have its original justification. The SEPH survey has much more complete coverage than its predecessor, and its aggregates provide much fuller coverage of the economy, both by industry and by size of employer, than did the Industrial Composite. For this reason, it was decided not to continue the Industrial Composite as a regular SEPH output. Users are encouraged to change to the new published data as soon as possible.

It is recognized, however, that in some cases the term "Industrial Composite" has been officially incorporated into formal documents. In these cases, it may require some time to alter the wording of the documents to incorporate the new statistics. To assist in such efforts, a special synthetic series, approximating the old Industrial Composite totals from SEPH data, is produced hereafter.

As a word of warning, because of changes in coverage, survey procedures, question wording and other factors that accompanied the survey revisions in April 1983, it is not possible to exactly reproduce the Industrial Composite. However, research has indicated that it is possible by combining selected subcategories to construct data series in which the average weekly earnings for Canada and provinces normally differ from previous data by one percent or less. These derived totals will be released until December 1985.

## ANNEXE 2

### ESTIMATIONS DE L'"ENSEMBLE DES INDUSTRIES"

Avant avril 1983, nous produisions des données sur l'emploi, la rémunération et les heures pour un regroupement appelé "ensemble des industries". Ce regroupement couvrait tous les secteurs de l'industrie sauf l'agriculture, le gouvernement, la défense, les hôpitaux, les écoles, les organismes religieux, les ménages privés, la pêche, le piégeage et la chasse; de plus, seules les firmes ayant 20 salariés ou plus étaient enquêtées. Ainsi, l'emploi et la rémunération hebdomadaire moyenne pour ce regroupement n'ont jamais constitué des mesures globales.

Avec les débuts de l'Enquête sur l'emploi, la rémunération et les heures de travail (EERH), le regroupement "ensemble des industries" n'a plus de raison d'être. L'enquête EERH couvre beaucoup plus de secteurs que l'enquête qu'elle remplace. De plus, ses regroupements représentent une couverture beaucoup plus complète de l'économie, tant par industrie que par taille d'employeur. Nous avons donc décidé de ne pas publier l'"ensemble des industries" dans le cadre de l'enquête EERH. Pour cette raison, nous recommandons aux utilisateurs de se tourner vers les nouvelles données publiées aussitôt que possible.

Nous reconnaissons que, dans certains cas, le terme "ensemble des industries" soit inclus officiellement dans le texte de documents formels. Il peut arriver que dans ces situations le changement de formulation pour s'accorder aux nouvelles statistiques demande un certain temps. Pour venir en aide aux utilisateurs pendant ce temps, nous publions ci-après des séries spéciales qui sont des approximations des anciennes séries de l'"ensemble des industries", calculées à partir des données de l'EERH.

Il ne faut pas oublier qu'il s'agit d'approximation. En effet, il est impossible de reproduire exactement l'"ensemble des industries" à cause des changements touchant la couverture de l'enquête, les règles de l'enquête, la formulation des questions et d'autres facteurs accompagnant la révision de l'enquête en avril 1983. Cependant, des recherches ont montré qu'il était possible, en combinant certaines sous-catégories, de construire des séries de données pour lesquelles la rémunération hebdomadaire moyenne pour le Canada et les provinces ne différerait des données réelles que de 1% ou moins. Nous publierons ces séries dérivées jusqu'au mois d'enquête: décembre 1985.

Estimates of Average Weekly Earnings for "Industrial Composite",  
Canada and Provinces

Estimations de la rémunération hebdomadaire moyenne pour l'"ensemble des industries",  
Canada et provinces

Area Région	Average weekly earnings Rémunération hebdomadaire moyenne	
	February 1984 Février	March 1984 Mars

(1) Includes Yukon and Northwest Territories. - Comprend le Yukon et les Territoires du Nord-Ouest.

## ANNEX 3

### Industry Conversion

The Survey of Employment, Payrolls and Hours uses the 1970 version of the Standard Industrial Classification, while the previous survey used the 1960 version.

There are some 1960 industry codes which simply do not have an equivalent 1970 code. For these industries, it is not possible to have a link between the old and new data. There are other 1960 industry codes which have only a partial fit with a 1970 code. These cases need to be qualified with a quality indicator. The indicators have been defined as follows:

- A = 100% overlap (complete match)
- B = less than 100% but at least 90% overlap
- C = less than 90% but at least 75% overlap
- D = less than 75% but at least 50% overlap
- E = anything less than 50%

It might be fair to interpret these letters as follows:

- A = excellent
- B = very good
- C = adequate
- D = marginal
- E = of no value

Note that the quality assessment used here does not include the fact that in many series, for purposes of gathering payroll and hours, a substantial number of small employers were added, the questionnaire wording and concepts were altered, and the survey procedures were changed.

## ANNEXE 3

### Conversion des industries

L'enquête sur l'emploi, la rémunération et les heures de travail fait usage de la version 1970 de la Classification des activités économiques, alors que les enquêtes antérieures utilisaient la version 1960.

Certains codes d'activité économique de 1960 n'existaient plus en 1970. Dans ce cas, il est impossible de lier les anciennes et les nouvelles données. D'autres codes de 1960 ne recoupent que partiellement ceux de 1970. Dans ces cas, on doit appliquer un indicateur de qualité. Ces indicateurs sont qualifiés comme suit:

- A = recoupement complet (100%)
- B = recoupement inférieur à 100% mais d'au moins 90%
- C = recoupement inférieur à 90% mais supérieur à 75%
- D = recoupement inférieur à 75% mais supérieur à 50%
- E = recoupement inférieur à 50%

Il convient de les interpréter comme suit:

- A = excellent
- B = très bien
- C = convenable
- D = médiocre
- E = sans valeur

Il convient de souligner que cette évaluation qualitative ne tient pas compte du fait que, dans plusieurs séries, un nombre important de petites entreprises ont été ajoutées dans le but de recueillir leurs données sur la rémunération et les heures; elle couvre, pas non plus les différences de formulation et de concepts dans les questionnaires, ni les différentes procédures d'enquête.

**EMPLOYMENT AND PAYROLL REPORTS**

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

**Catalogue**

**Monthly**

72-002 Employment, Earnings and Hours. Bil.

Industry and area data on industrial employment, average weekly earnings average weekly hours and average hourly earnings.

72-008 Estimates of Employees by Province and Industry. Bil.

Monthly estimates of total employment in non-agricultural industries for Canada and the provinces, (This publication is terminated with March 1983 data).

**Quarterly**

72-005 Estimates of Labour Income. Bil.

Monthly estimates of wages and salaries and supplementary labour income on unadjusted and seasonally adjusted basis by industry for Canada and the provinces with annual totals.

**Occasional**

72-516 Estimates of Employees by Province and Industry, 1961-1976. Bil.

Monthly estimates of total employees by industry and province in the non-agricultural sector - both seasonally adjusted and unadjusted series, 1961-1976.

72-517 Employment, Earnings and Hours, 1978. Bil.

Employment, earnings and hours statistics for the months of January to April 1978 inclusively which supersede data previously published in the monthly publication 72-002.

**PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION**

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

**Catalogue**

**Mensuel**

72-002 Emploi, gains et durée du travail. Bil.

Données par industrie et par région sur l'emploi, les gains hebdomadaires moyens du travail, les gains horaires moyens et les heures hebdomadaires moyennes.

72-008 Estimations du nombre de salariés par province et par industrie. Bil.

Estimations mensuelles de l'ensemble des effectifs dans les industries non agricoles pour le Canada et les provinces. (Cette publication se termine avec les estimations de mars 1983).

**Trimestriel**

72-005 Estimations du revenu du travail. Bil.

Estimations mensuelles des salaires, des traitements et du revenu supplémentaire du travail, désaisonnalisées et non désaisonnalisées, par branche d'activité économique pour le Canada et les provinces, de même que des totaux annuels.

**Hors série**

72-516 Estimations du nombre de salariés par province et par industrie, 1961-1976. Bil.

Estimations mensuelles désaisonnalisées et non désaisonnalisées du nombre total de salariés par industrie et par province pour l'ensemble des industries non agricoles de 1961-1976.

72-517 Emploi, gains et durée du travail, 1978. Bil.

Chiffres révisés de l'emploi, des gains et de la durée du travail pour les mois de janvier à avril 1978 inclusivement. Ces données remplacent celles qui avaient été précédemment publiées dans les éditions mensuelles de la publication numéro 72-002 au catalogue.

### Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Employment, earnings and hours

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9900) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

### How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0T6.

### Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolinguée et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Emploi, gains et durée du travail

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9900) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)

## COMMENTARY

### Preliminary Estimates<sup>1</sup> - April 1984 (Unadjusted data)

The preliminary estimates of employment for Canada industrial aggregate<sup>2</sup> increased by 2.2% from March to April 1984. All industries increased except forestry which registered decreases. All provinces and territories contributed to the increase with the exception of the Northwest Territories which decreased.

Average weekly earnings, at the Canada industrial level, decreased by 0.2% from \$399.78 in March to \$398.79 in April. Decreases were registered in mining, manufacturing, construction and trade while the remaining industries increased. All provinces and territories decreased except Newfoundland, New Brunswick, Saskatchewan and British Columbia which increased.

<sup>1</sup> See note on "Statistical Presentation" under "Concepts and Methods" at the back of this publication.

<sup>2</sup> Industrial Aggregate is the sum of all industries with the exception of agriculture, fishing and trapping, private household services, religious organizations, and military services.

## OBSERVATIONS

### Estimations préliminaires<sup>1</sup> - Avril 1984 (chiffres non désaisonnalisés)

Les estimations préliminaires de l'emploi pour l'ensemble des activités économiques<sup>2</sup> au Canada indiquent une augmentation de 2.2% de mars à avril 1984. On observe une hausse dans toutes les divisions de l'activité économique à l'exception du forage qui a diminué. Exception faite des Territoires du Nord-Ouest, toutes les provinces et territoires ont contribué à cette augmentation.

Les gains hebdomadaires moyens pour l'ensemble des activités économiques au Canada ont diminué de 0.2% passant de \$399.78 en mars à \$398.79 en avril. Des baisses ont été enregistrées dans les mines, les manufactures, la construction et le commerce alors que les autres divisions de l'activité économique ont augmenté. toutes les provinces et territoires ont diminué à l'exception de Terre-Neuve, du Nouveau-Brunswick, de la Saskatchewan et de la Colombie-Britannique qui ont augmenté.

<sup>1</sup> Voir la partie "Présentation statistique" sous la rubrique "concepts et méthodes", à la fin de cette publication.

<sup>2</sup> L'ensemble des activités économiques comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, le service domestique des ménages, les organismes religieux et les services de la défense.

## NOTE TO USERS

Effective with the April 1983 reference month, the estimates contained in this publication replace those previously published in catalogue numbers 72-002 (Employment, Earnings and Hours) and 72-008 (Estimates of Employees by Province and Industry).

These new estimates are obtained from the revised monthly Survey of Employment, Payrolls and Hours. The major characteristics of this survey are as follows:

1. It includes firms of all sizes;
2. It covers all industries except agriculture, fishing and trapping, household services, religious organizations, and the military personnel;
3. It makes use of census and sampling methodologies with a part of the sample rotating each month;
4. It uses the 1970 version of the Standard Industrial Classification and the 1981 version of the Standard Geographical Classification;
5. It groups employees according to the method of payments (i.e. salaried employees, hourly-rated employees, other types of employees);
6. It produces statistics on overtime earnings and hours;
7. It aggregates data according to different mixtures of the units selected in the survey sample (i.e. all units, take-all units, take-some units).

The new survey has been designed to produce reliable estimates at the broad industry division levels for provinces, and at the "3-digit" industry level for Canada; the reliability of the estimates decreases at more disaggregated industrial or geographical levels.

More detailed information is given in "Concepts and Methods" at the end of this publication on methodology, concepts and definitions.

In order to help users in making the transition from the old to the new estimates, March 1983 data from the old surveys and from the new survey are published separately. This issue of the publication contains the estimates of the new survey. When bridging the two sets of estimates, users should consult the industrial conversion table at the end of this publication (see Annex 3).

Another special table (see Annex 2) provides estimates of the old "industrial composite" series for Canada and the provinces. These estimates will be terminated after the production of the December 1985 data.

The new estimates contained in this publication also appear in the Canadian Socio-economic Information Management System (CANSIM); the new reference matrix and series numbers are given at the end of this publication.

For further details, please contact Labour Division at (613) 995-7165.

## NOTE AUX UTILISATEURS

Depuis le mois de référence avril 1983, les estimations qui apparaissent dans cette publication remplacent celles qui étaient auparavant publiées dans les catalogues 72-002 (Emploi, gains et durée du travail) et 72-008 (Estimations du nombre de salariés par province et par industrie).

Les nouvelles estimations proviennent de l'enquête mensuelle révisée sur l'emploi, la rémunération et les heures de travail. Les caractéristiques principales de cette enquête sont les suivantes:

1. Elle regroupe des compagnies, établissements et organismes de toutes tailles;
2. Elle couvre toutes les industries sauf l'agriculture, la pêche et le piégeage, les ménages privés, les organismes religieux et les services de la défense;
3. Elle utilise un mélange de recensement et d'échantillonnage, une partie de l'échantillon étant remplacée chaque mois;
4. Elle utilise la version 1970 du manuel "Classification des activités économiques", ainsi que la version 1981 du manuel "Classification géographique type";
5. Elle regroupe les salariés selon leur mode de paiement (i.e. employés, salariés rémunérés à l'heure, autres types de salariés);
6. Elle fournit des statistiques sur la rémunération pour heures supplémentaires et sur le nombre d'heures supplémentaires;
7. Elle rassemble les données correspondant à certains regroupements des unités choisies dans l'échantillon (i.e. ensemble des unités, unités à tirage complet, unités à tirage partiel).

La nouvelle enquête a été construite de façon à fournir des estimations fiables aux niveaux agrégés des divisions industrielles pour les provinces et au niveau industriel à trois chiffres pour le Canada; la fiabilité des estimations diminue à des niveaux industriels et géographiques plus détaillés.

Vous trouverez des informations plus détaillées concernant la méthodologie, les concepts et les définitions, à la fin de cette publication, sous la rubrique "Concepts et méthodes".

Afin d'aider les utilisateurs à faire la transition entre les anciennes estimations et les nouvelles, les données de mars 1983 sont publiées pour les anciennes enquêtes et pour la nouvelle. Cette publication contient les données de la nouvelle enquête. En reliant les deux ensembles d'estimations, les utilisateurs devraient référer au tableau de conversion des industries (1960 à 1970) à la fin de cette publication (annexe 3).

Un autre tableau spécial (voir annexe 2) contient les estimations des anciennes séries "ensemble des industries" pour le Canada et les provinces. Ces estimations s'achèveront avec l'apparition des données de décembre 1985.

Les nouvelles estimations qui apparaissent dans cette publication sont également disponibles par le biais du Système canadien d'information socio-économique (CANSIM); les nouveaux numéros de référence des matrices et séries CANSIM se trouvent à la fin de cette publication.

Pour de plus amples renseignements, contactez la Division du travail au numéro (613) 995-7165.

62-165	Rubber & plastics products - Industrie du caoutchouc & prod. en matière plastique	24.56	22.69	21.10	9.49	9.98	17.55	29.92	27.31	22.79
62	Rubber products - Industrie des produits en caoutchouc	31.29	29.61	25.22	13.21	15.18	28.77	40.80	37.39	23.62
65	Plastics fabricating, n.e.s. - Fabrication d'articles en matière plastique, n.c.a.	19.73	17.69	18.53	4.91	3.56	6.70	23.48	21.31	22.35
72-179	Leather products - Industrie du cuir	4.00	4.49	4.33	1.72	1.84	2.39	4.98	5.61	5.30
72	Leather tanneries - Tanneries	13.88	9.61	25.12	2.32	3.23	1.70	16.55	11.10	30.82
74	Shoe factories - Fabriques de chaussures	2.91	2.63	2.66	2.54	2.69	2.56	3.39	2.96	3.04
75	Leather glove factories - Fabriques de gants en cuir	3.16	2.50	0.24	...	...	...	...	...	...
79	Luggage, handbags & small leather goods - Valises, sacs à main & menus art. en cuir	3.31	6.79	3.61	0.49	0.45	2.56	4.29	9.00	4.11
31-189	Textile products - Industrie textile	16.00	18.42	14.15	9.95	10.33	10.88	18.99	22.29	16.18
32	Wool yarn & cloth - Filature et tissage de la laine	8.50	8.18	6.96	3.68	2.46	2.34	10.63	10.64	9.18
33	Man-made fibre, yarn & cloth - Fibres, filés & tissus artif. & synthét.	18.24	19.94	20.01	10.20	6.33	22.10	21.76	25.50	20.26
34	Cordage & twine - Corderie et ficellerie (fabrication)	2.49	3.07	1.22	-	-	-	4.26	5.20	2.00
35	Felt & fibre processing mills - Industrie du feutre et du traitement des fibres	13.91	20.96	16.37	2.78	2.95	-	17.59	26.50	20.53
36	Carpet, mat & rug - Tapis, carpettes et moquette	14.72	15.42	19.49	12.50	8.95	9.55	16.07	18.60	23.48
37	Canvas prod., cotton & jute bags ind. - Art. en grosse toile, sacs de coton & de jute	3.77	4.23	9.35	0.75	0.09	2.71	5.10	6.05	12.95
38	Automobile fabric accessories - Accessoires en tissu pour l'automobile	21.19	23.74	27.11	37.35	57.94	53.55	18.81	18.53	22.82
39	Miscellaneous textiles - Industries textiles diverses	16.32	19.85	14.20	8.67	9.49	5.72	19.27	23.97	17.30
1-239	Knitting mills - Bonneterie	12.59	13.74	12.73	4.61	4.06	5.42	19.55	19.92	17.39
1	Hosiery - Industrie des bas & chaussettes	7.38	6.03	3.57	5.30	5.39	1.56	10.60	7.36	5.72
9	Knitting mills (except hosiery) - Bonneterie (sauf bas & chaussettes)	14.30	16.25	15.42	4.35	3.62	6.42	22.38	24.10	20.22
3-249	Clothing - Industrie de l'habillement	3.90	5.13	2.73	0.99	1.35	0.80	5.59	7.44	4.23
3	Men's clothing - Vêtements pour hommes	3.54	5.19	2.08	1.48	2.17	1.06	5.20	7.72	3.47
4	Women's clothing - Vêtements pour dames	4.68	5.54	3.05	0.56	0.78	0.37	6.70	8.09	4.65
5	Children's clothing - Vêtements pour enfants	1.65	2.49	1.45	0.18	0.02	0.18	2.37	3.50	1.88
6	Fur goods - Articles en fourrure	7.10	10.05	11.45	0.48	-	2.16	9.43	13.29	16.89
8	Foundation garment - Corsets et soutiens-gorge	2.51	2.65	3.12	1.08	1.51	2.14	3.92	4.15	5.14
9	Miscellaneous clothing - Industries diverses de l'habillement	3.14	5.03	3.37	2.06	2.44	0.78	3.73	6.27	4.51
1-259	Wood - Industrie du bois	18.36	17.26	15.15	1.19	1.04	1.21	21.90	20.87	19.23
1	Saw, planing & shingle mills - Scieries, rabotage et bardeaux	19.24	18.30	17.09	0.98	1.29	1.06	22.54	21.78	20.65
2	Veneer and plywood mills - Fabriques de placages et de contre-plaques	21.98	18.04	17.19	1.91	1.27	0.85	25.00	20.37	19.96
4	Sash, door and other millwork plants - Portes, châssis et autres bois ouvrés	12.96	12.26	12.77	0.35	0.35	1.48	16.43	15.69	16.99
3	Wooden box factories - Fabriques de boîtes en bois	7.99	9.46	3.68	6.05	-	1.33	8.71	11.64	4.59
3	Coffin and casket industry - Industrie des cercueils	1.08	2.61	7.43	...	...	...	...	...	...
2	Miscellaneous wood industries - Industries diverses du bois	31.02	30.31	11.62	...	...	...	...	...	...
2-268	Furniture and fixtures - Meubles et articles d'ameublement	7.95	9.94	6.61	3.19	3.47	1.26	9.89	12.49	8.70
2	Household furniture - Meubles de maison	6.40	7.92	6.78	2.51	2.71	0.60	7.86	9.80	8.75
2	Office furniture - Meubles de bureau	14.11	28.72	7.55	10.30	10.11	3.38	15.95	37.04	9.18
2	Misc. furniture & fixtures - Articles d'ameublement divers	9.40	4.50	6.10	0.78	1.19	1.59	13.15	5.96	9.05

Concepts and methods are described at the back of this publication.  
Les concepts et méthodes sont décrits à la fin de la présente publication.

## CONCEPTS AND METHODS

### Objectives

The Survey of Employment, Payrolls and Hours is designed to measure, on a monthly basis, the levels and month-to-month trends of employment, paid hours and earnings. These measures are compiled and published at detailed industrial and geographic levels.

All industries are covered by the survey with the exception of agriculture, fishing and trapping, private household services, religious organizations, and military services.

### Source of Data

The statistics contained in this report are based on information obtained through a mail survey of firms, institutions and organizations of all sizes.

The **firm** is defined as any business entity whether incorporated or not; it comprises sole proprietorships, partnerships, corporations and other forms of organization such as co-operatives. Most firms consist of only one "establishment" (see definition under Industrial Classification) but, in some cases, the firm is made up of a number of establishments which may or may not be engaged in the same kind of economic activity.

The universe for the survey is derived from a central file of employers maintained by the Business Register and Profiling Division of Statistics Canada.

### Industrial Classification

All **firms** are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straightforward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The **establishment** (typically a factory, mine, store or a similar unit) is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into **reporting units** which, although not capable of reporting all basic industrial statistics, can report employment, payrolls and hours data for particular locations.

## CONCEPTS ET MÉTHODES

### Objectifs

L'enquête sur l'emploi, la rémunération et les heures de travail a pour objet de mesurer mensuellement les niveaux et les tendances de l'emploi, des heures rémunérées et des gains. Ces mesures sont rassemblées et publiées à des niveaux détaillés selon l'activité économique et le lieu géographique.

L'enquête vise tous les secteurs de l'activité économique sauf l'agriculture, la pêche et le piégeage, le service domestique des ménages, les organismes religieux et les services de la défense.

### Source des données

Les statistiques présentées dans ce bulletin se fondent sur des renseignements recueillis au moyen d'une enquête postale menée auprès des entreprises et autres organismes ou établissements de toutes tailles.

Le terme **entreprise** désigne toute entité commerciale ou industrielle constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme quelconque d'organisation, telle une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité.

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu par la Division des profils et du registre des entreprises de Statistique Canada.

### Classement par activité économique

Toutes les **entreprises** appartiennent à une branche d'activité économique déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un **établissement**. À des fins statistiques, on définit l'établissement (en général une usine, une mine, un magasin ou une unité semblable) comme la plus petite unité constituant un ensemble fonctionnel distinct capable de déclarer, à l'égard de l'activité économique, tous les éléments statistiques de base qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour obtenir des statistiques géographiques détaillées, souvent on subdivise l'établissement en **unités déclarantes** qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi, la rémunération et les heures de travail relativement à certains endroits.

The industrial classification of the statistics contained in this report is based on the 1970 version of the Standard Industrial Classification. A description of the various industries and groups of industries is contained in the "Standard Industrial Classification Manual", Catalogue No. 12-501. The "S.I.C. Code" columns on the tables correspond to the codes of this manual. These tables also contain the following groupings which are not part of the "Standard Industrial Classification Manual":

- a) Industrial aggregate (031-951) represents the sum of all the industries included in the survey (see Objectives).
- b) Goods-producing industries (031-421) comprise forestry, mining, manufacturing and construction.
- c) Service-producing industries (501 to 951) consist of transportation, communication and other utilities, trade, finance, insurance and real estate, services (except for religious organizations and private households), and public administration (with the exception of military personnel, and other government services).
- d) Durable goods manufacturing (durable) includes wood industries (251-259), furniture and fixture industries (261-268), primary metal industries (291-298), metal fabricating industries except machinery and transportation equipment (301-309), machinery industries except electrical machinery (311-318), transportation equipment industries (321-329), electrical products industries (331-339), and non-metallic mineral products industries (351-359).
- e) Non-durable goods manufacturing (non-dur) is the sum of food and beverage industries (101-109), tobacco products industries (151-153), rubber and plastic products industries (162-165), leather industries (172-179), textile industries (181-189), knitting mills (231-239), clothing industries (243-249), paper and allied industries (271-274), printing, publishing and allied industries (286-289), petroleum and coal products industries (365-369), chemical and chemical products industries (372-379), and miscellaneous manufacturing industries (391-399).
- f) Building construction (404, 421) comprises building construction (404) and special-trade contractors (421).
- g) Engineering construction (406, 409) includes highway, bridge and street construction (406) and other construction (409).
- h) Education services (809T) consist of kindergartens and nursery schools (801), elementary and secondary schools (802), schools of arts and performing arts (803), vocational centers, trade schools and business colleges (804), post-secondary non-university educational institutions (805), universities and colleges (806), and education and related services (809).

Le classement des statistiques que nous présentons dans ce volume s'inspire de la Classification des activités économiques, de 1970. Vous trouverez une description de ces diverses activités et de leurs groupements dans le bulletin de la Classification des activités économiques, n<sup>o</sup> 12-501 au catalogue. Les codes C.A.É. qui apparaissent dans les colonnes de certains tableaux de notre publication correspondent au codes de ce bulletin. Les tableaux en question renferment aussi les groupes suivants, qui ne figurent pas dans la Classification des activités économiques:

- a) Ensemble des activités économiques (031-951) — Il s'agit de la somme des diverses activités économiques visées par l'enquête (voir objectifs).
- b) Branche productrice de biens (031-421) — Ce groupe englobe les forêts, les mines, les manufactures et la construction.
- c) Branche des services (501-951) — Englobe les transports, les communications et autres services publics, le commerce, les finances, assurances et affaires immobilières, les services (sauf les organismes religieux et les ménages privés), et l'administration publique (à l'exception du personnel militaire et des autres services gouvernementaux).
- d) Fabrication des biens durables (durables) — Englobe les industries du bois (251-259), l'industrie du meuble et des accessoires d'ameublement (261-268), l'industrie de première transformation des métaux (291-298), l'industrie des produits métalliques (sauf les machines et le matériel de transport) (301-309), la fabrication des machines (sauf le matériel électrique) (311-318), l'industrie du matériel de transport (321-329), l'industrie des appareils et du matériel électriques (331-339) et l'industrie des produits minéraux non métalliques (351-359).
- e) Fabrication des biens non durables (non dur.) — Englobe l'industrie des aliments et boissons (101-109), l'industrie du tabac (151-153), l'industrie du caoutchouc et des produits en matière plastique (162-165), l'industrie du cuir (172-179), l'industrie textile (181-189), la bonneterie (231-239), l'industrie de l'habillement (243-249), l'industrie du papier et des produits connexes (271-274), l'imprimerie, l'édition et industries connexes (286-289), l'industrie du pétrole, du charbon et de leurs dérivés (360-369), l'industrie chimique et des produits connexes (372-379), et les industries manufacturières diverses (391-399).
- f) Bâtiment (404, 421) — Englobe la construction de bâtiments (404) et l'activité des entrepreneurs spécialisés (421).
- g) Génie civil (406, 409) — Englobe la construction de routes, ponts et rues (406) et autres constructions (409).
- h) Enseignement et services connexes (809T) — Englobe les jardins d'enfants et écoles maternelles (801), les écoles primaires et secondaires (802), les écoles de beaux-arts (803), les centres de formation professionnelle, écoles de métiers et collèges commerciaux (804), les établissements d'enseignement postsecondaire non universitaire (805), les universités et collèges (806), et l'enseignement et services connexes (809).

- i) Public administration (909-951) contains only the establishments engaged in activities that are governmental in character and those serving as internal service agencies of the public service. Government-owned establishments primarily engaged in activities assigned to other industries are classified in those industries along with similar establishments owned by non-government bodies. Therefore, data included in this industry division do not represent the actual number of persons employed by government at any level.

## Geographic Classification

Reporting units are assigned to a province, a census division, an economic region (for the province of Quebec and Ontario) and, where applicable, to a metropolitan or urban area. The survey selected metropolitan and urban areas as delineated for the 1981 Census of Population; these areas usually consist of the urban centre as well as the surrounding territory and had a population of 25,000 inhabitants or more. The reporting units not located in a tabulated urban area or not allocated to a compiled census division are included in the provincial and national totals.

A description of the various geographical areas is contained in the "Standard Geographical Classification Manual, 1981", Catalogue No. 12-567.

## Definitions

### 1. Reference Period

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are asked to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period.

If, owing to **strikes**, unpaid holidays or other similar unpaid circumstances, the data reported are not representative of the last seven days of the month, adjustments are made to reflect the economic situation of the reference period (i.e. when a strike effects the last seven days of the survey month, the derived data will reflect the strike situation).

### 2. Employee

All persons drawing pay for services rendered or for paid absences and for whom the employer is required to complete a Revenue Canada T-4 Supplementary Form constitute employees.

- i) Administration publique (909-951) — Comprend les établissements dont les activités ont un caractère essentiellement gouvernemental, et les organismes auxiliaires assurant les services internes de l'État. Les établissements publics dont l'activité dominante relève d'autres activités économiques sont classés sous les mêmes rubriques que les établissements privés semblables. Ainsi, les données publiées pour cette division économique ne représentent pas le nombre réel de personnes employées par les différents pouvoirs publics.

## Classement géographique

On attribue les unités déclarantes à une province, à une division de recensement, à une région économique (pour les provinces suivantes: Québec et Ontario) et, s'il y a lieu, à une région métropolitaine ou urbaine. Les régions métropolitaines et urbaines choisies pour l'enquête sont celles du recensement de la population de 1981; ces régions, qui se composent habituellement d'un centre urbain et du territoire environnant, comptaient lors du dernier recensement 25,000 habitants ou plus. Les unités déclarantes situées en dehors de toute région urbaine indiquée dans les tableaux, ou non attribuées à une division de recensement prise en compte, font partie des totaux provinciaux et nationaux.

La description des diverses régions géographiques se trouve dans la "Classification géographique type, 1981", numéro 12-567 au catalogue.

## Définitions

### 1. Période de référence

En théorie, les données sur l'emploi se rapportent aux sept derniers jours du mois de référence. Dans la pratique, peu d'entreprises tiennent des registres de paye pour cette période précise; on demande donc aux répondants de faire porter leur déclaration sur la(les) dernière(s) période(s) de paye de chaque mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en divisant le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye sur laquelle porte la déclaration.

Si, en raison d'une **grève**, d'un congé non payé ou d'autres circonstances semblables, les données déclarées ne sont pas représentatives des sept derniers jours du mois, on procède aux rajustements qui s'imposent afin de traduire la situation qui régnait pendant la période de référence (cela signifie que lorsqu'une grève touche les sept derniers jours du mois d'enquête, les données qui en découlent reflètent l'état de grève).

### 2. Salarié

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada, est un salarié.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment) and casual or temporary employees (those who are hired for discontinuous periods or on an irregular basis). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensioners, home workers, members of elected or appointed bodies, persons working outside Canada, military personnel and persons providing services to an establishment on a contract basis. It also excludes persons who did not receive any pay from the employer for the entire survey reference period (e.g. persons on strike, persons on unpaid holidays, persons receiving remuneration from an insurance, Workmen's Compensation or other related fund, etc.); however, employees paid from the employer for a part of the reference period and unemployed or on strike for the rest are counted as employed.

The employees are classified into the following categories:

**a) Employees paid by the hour**

Any employee whose basic wage is expressed as an hourly rate.

**b) Salaried Employees**

Any employee whose basic remuneration is a fixed amount for a period of at least one week.

**c) Other Employees**

Those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc.

**d) Non-teaching Staff**

All employees other than teachers and academic staff, i.e. president, vice-president, librarian, registrar, bursar, accountant, guidance counsellor, laboratory technician, personnel officer, and other services (e.g. janitor, caretaker, bus driver, etc.)

**e) Teaching Staff**

Those classified as teachers, instructors or academics in the payroll records (e.g. principal, professor, dean, head of department, master, teacher, etc.) whether they teach during the day or evening. Supply or substitute teachers are excluded.

Le terme "salariés" désigne les salariés à temps plein, les salariés à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels ou temporaires (ceux qui sont embauchés de façon irrégulière ou temporaire). Il désigne aussi les propriétaires, les administrateurs, les associés et les autres dirigeants actifs des entreprises constituées en corporation.

Le concept de salarié exclut les propriétaires et les associés des entreprises non constituées en corporation et ceux des bureaux voués à l'exercice d'une profession libérale, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les retraités, les travailleurs à domicile, les membres des corps élus ou nommés, les personnes travaillant à l'extérieur du Canada, le personnel militaire et les personnes fournissant des services à un établissement sur une base forfaitaire. Sont également exclus les travailleurs n'ayant pas reçu de paye de leur employeur pendant la période de référence de l'enquête (i.e. les personnes en grève, en congé non payé, celles recevant une rémunération aux termes d'un régime d'assurance, d'une caisse d'indemnisation des accidents au travail ou d'une caisse analogue, etc.); cependant, les travailleurs rémunérés par leur employeur pour une partie de la période de référence, mais en chômage ou en grève pendant l'autre partie, sont quand même considérés comme salariés.

Les salariés sont classés dans les catégories suivantes:

**a) Salariés rémunérés à l'heure**

Tout salarié dont la rémunération de base est calculée selon un taux horaire.

**b) Employés**

Tout salarié dont la rémunération de base constitue une somme fixe versée pour une période d'au moins une semaine.

**c) Autres salariés**

Tout salarié dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de trajet, etc.

**d) Personnel non enseignant**

Tous les salariés autres que le personnel enseignant, c'est-à-dire le président, le vice-président, le bibliothécaire, le secrétaire général, l'économe, le comptable, les orienteurs, les techniciens de laboratoire, les agents du personnel, le concierge, les chauffeurs d'autobus, etc.

**e) Personnel enseignant**

Tout travailleur classé comme enseignant ou chargé de cours dans les dossiers du service de la paye (directeur, professeurs, doyens, chefs de département, maîtres, enseignants, etc.), qu'il enseigne le jour ou le soir. Les suppléants ou remplaçants sont exclus.

f) **Supply or Substitute Teachers**

Teachers who are called in to teach whenever their services are needed either to augment the existing staff or as a short-term replacement for a full-time or part-time teacher.

3. **Earnings**

Earnings represent gross pay before deductions for taxes, unemployment insurance contributions, etc.

The payroll concept does not include supplementary labour costs such as employer's contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or director's fees.

a) **Gross Pay**

Gross pay includes salaries, straight-time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings **and** payments to persons absent with pay in the survey reference week.

b) **Overtime Pay**

All pay received for the number of hours worked in excess of the standard workday or workweek.

4. **Hours**

a) **Total hours paid**

All hours worked, including overtime hours, **plus** hours of paid absence (e.g. holidays, vacation, sick leave, jury duty, etc.)

b) **Overtime Hours**

The total hours for which overtime was paid. These represent the hours worked.

5. **Paid Absence**

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

f) **Suppléants ou remplaçants**

Enseignants appelés à se présenter au travail lorsqu'on a besoin de leurs services soit pour accroître le personnel existant, soit pour remplacer pendant une courte période un enseignant à temps plein ou à temps partiel.

3. **Gains**

Les gains représentent la rémunération brute avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc.

Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents, ni les jetons de présence des administrateurs.

a) **Rémunération brute**

Comprend les salaires, les traitements à taux ordinaires, la rémunération du travail à la pièce et les commissions régulières, ainsi que les primes, indemnités de vie chère et autres gratifications versées régulièrement, les payes de surtemps **et** la rémunération des absences payées dans la semaine de référence de l'enquête.

b) **Rémunération du surtemps**

Ensemble de la rémunération versée pour le nombre d'heures de travail effectuées en sus de la journée ou de la semaine normale de travail.

4. **Heures**

a) **Nombre total d'heures payées**

Ensemble des heures travaillées, y compris les heures supplémentaires, **plus** les heures de congé (par ex., les jours fériés, les vacances, les congés de maladie, les congés pour service judiciaire, etc.)

b) **Heures de surtemps**

Total des heures payées à un taux majoré; il s'agit d'heures réellement travaillées.

5. **Absence payée**

Les absences payées comprennent toutes les heures rémunérées dans le cas des jours fériés payés, des vacances, des congés de maladie, ainsi que des congés d'accident du travail et des congés pour motifs personnels tels que les congés de deuil et les congés pour service judiciaire.

## 6. Standard Workweek

The hours in the standard workweek constitute the average number of hours of work normally scheduled in a workweek.

## 7. Take-all and Take-some Units

Take-all units are those reporting units which are included in the survey sample with certainty every month. These include:

- a) All units having 200 or more employees;
- b) All units of "firms" with more than one reporting unit;
- c) Units which report their survey data on computer listings rather than on the standard questionnaire;
- d) Units of government departments and crown corporations;
- e) Units belonging to elementary and secondary schools;
- f) Certain other pre-specified units.

Take-some units are all the other units in the universe which have a known probability of selection.

## 6. Semaine normale de travail

Les heures d'une semaine normale de travail reflètent la moyenne des heures de travail normalement fixées pour une semaine.

## 7. Unités à tirage complet et à tirage partiel

Les unités à tirage complet sont les unités déclarantes incluses en permanence dans l'échantillon de l'enquête. Elles comprennent:

- a) toutes les unités de 200 salariés ou plus;
- b) toutes les unités des "entreprises" possédant plus d'une unité déclarante;
- c) les unités qui déclarent leurs données au moyen d'un imprimé d'ordinateur plutôt qu'à l'aide du questionnaire;
- d) unités des services gouvernementaux et des sociétés de la couronne;
- e) unités propres aux écoles primaires et secondaires;
- f) d'autres unités préalablement choisies.

Les unités à tirage partiel sont toutes les autres unités qui ont une probabilité connue de ne pas être choisies dans l'échantillon de l'enquête. Lorsqu'elles sont choisies, de telles unités sortent de l'enquête après un certain nombre de mois.

## Methodology

The statistics contained in this publication are based on information obtained through a sample survey of reporting units. The data is collected by means of questionnaires mailed monthly to a sample of about 70,000 reporting units selected out of a universe of about 700,000. The sample covers all industries in scope for the survey, all provinces and territories and all sizes of units. Both the universe and the sample are updated monthly for births and deaths.

### Stratification

For the determination of the survey sample size and for the purpose of the sample selection, the universe of reporting units is stratified by 12 provinces and territories, 16 industry groups and 4 size groups. (An industry group is slightly more detailed than the 1-digit industry code). The size of a unit is defined to be the total number of paid employees in that unit. The four size groups are 0 to 19, 20 to 49, 50 to 199 and 200 or more employees.

The universe of reporting units is further stratified into **take-all** and **take-some** categories as defined earlier under Definitions.

## Méthodologie

Les statistiques présentées dans cette publication se fondent sur les résultats d'une enquête effectuée par sondage auprès d'unités déclarantes. Les données sont recueillies au moyen d'un questionnaire posté tous les mois à un échantillon de quelque 70,000 unités déclarantes provenant d'un univers d'environ 700,000 unités. L'échantillon couvre toutes les activités économiques que vise l'enquête, ainsi que toutes les provinces et les territoires et toutes les tailles d'unité. Chaque mois, nous mettons à jour l'univers ainsi que l'échantillon, en tenant compte des créations et des disparitions d'unités ou d'entreprises.

### Stratification

Pour déterminer la taille et la composition de l'échantillon, nous répartissons l'univers des unités déclarantes en 12 provinces et territoires, 16 groupes industriels (activités économiques) et quatre groupes de taille. (Un groupe industriel est légèrement plus détaillé qu'une industrie dont le code n'a qu'un chiffre). La taille d'une unité se définit comme étant le nombre total de salariés rémunérés que compte cette unité. Les quatre groupes de taille sont 0 à 19, 20 à 49, 50 à 199 et 200 salariés et plus.

En outre, l'univers des unités déclarantes est stratifié en deux catégories: les unités à **tirage complet** et les unités à **tirage partiel**, au sens que nous avons précisé dans la section "Définitions".

## Sample allocation and selection

The size of the take-some sample for the survey has been determined so as to provide estimates of total number of paid employees at the industry group and province level with a prespecified reliability. The determination has been done under the requirement that the sample at the industry group and province level is allocated to each size group in proportion to the total estimated take-some employment in that size group. If the sampling fraction resulting from this allocation is less than .01, then a minimum sampling fraction of .01 is adopted in order to avoid unusually large weights. The allocation makes the probability of inclusion of a unit in the sample in a size stratum approximately proportional to the average number of employees per unit in that size stratum. The sample design, therefore, provides for a small sample of small reporting units if the concentration of employment is mainly in the large reporting units. On the other hand, if the proportion of total employment from small reporting units is substantial, then the sample will include a large number of small reporting units.

The number of reporting units to be selected at the industry group, province and size levels is again allocated to each three-digit industry within that industry group, province and size in proportion to the total number of reporting units in that three-digit industry. In other words, the sampling fraction used at the three-digit industry level is the same as the one determined at the industry group, province and size. However, it should be noted that a minimum sample of three units is selected whenever the use of the sampling fraction results in less than 3 units. If the universe itself is less than three units, then all the units are taken into the sample.

A systematic sample of the predetermined number of units is drawn from the take-some universe in every three-digit industry, province and size group. The total sample is the sum of the number of take-all and selected take-some units.

## Sample rotation

The design provides for rotation of the take-some sample within a three-digit industry, province and size group. Each month, approximately one-twelfth of the take-some sample is replaced. This means that units generally remain in the sample for 12 months before rotating out. The units are not eligible for reselection for at least 12 months after they rotate out.

In some small three-digit industry, province and size group cells it may not be possible to rotate out units each month. Consequently, in some small cells, units may have to stay longer than 12 months.

## Répartition et choix de l'échantillon

La taille de la portion à tirage partiel de l'échantillon a été déterminée de façon à fournir, avec une fiabilité prédéterminée, des estimations du nombre total de salariés rémunérés, au niveau du groupe industriel et de la province. Ce calcul tient compte du fait que l'échantillon, au niveau du groupe industriel et de la province, doit être réparti dans chaque groupe de taille proportionnellement à l'estimation de l'emploi total au sein de la portion à tirage partiel de chacun des groupes de taille. Si la fraction d'échantillon résultant de cette répartition est inférieure à 0.01, on la remplace alors par la fraction minimale 0.01 afin d'éviter toute pondération excessive. La répartition est telle que la probabilité qu'une unité entre dans une strate particulière de l'échantillon est à peu près proportionnelle au nombre moyen de salariés par unité comprise dans cette strate. Le plan d'échantillonnage prévoit donc un petit échantillon de petites unités déclarantes lorsque l'emploi se concentre principalement dans les grandes unités déclarantes. Par contre, si l'emploi total provenant des petites unités déclarantes est élevé, alors l'échantillon contiendra un grand nombre de petites unités déclarantes.

Le nombre d'unités qu'il faut choisir au niveau du groupe industriel, de la province et de la taille est, en outre, réparti entre chacune des industries ayant un code à trois chiffres, lesquelles font partie du groupe industriel, de la province et de la taille considérés; cette répartition se fait proportionnellement au nombre total d'unités déclarantes comprises dans l'industrie dont le code comporte trois chiffres. En d'autres termes, la fraction d'échantillon utilisée au niveau industriel à trois chiffres est la même que celle déterminée pour le groupe industriel, la province et la taille. Il faut cependant noter que l'échantillon minimal est de trois unités, peu importe le résultat obtenu en utilisant la fraction d'échantillon. S'il y a moins de trois unités dans l'univers, toutes les unités disponibles sont incluses dans l'échantillon.

Au sein de la portion à tirage partiel, on choisit un échantillon systématique d'un nombre prédéterminé d'unités dans chaque industrie ayant un code à trois chiffres, et ce dans chaque province et chaque groupe de taille. L'échantillon total résulte de la somme du nombre d'unités à tirage complet et du nombre d'unités à tirage partiel sélectionnées.

## Rotation de l'échantillon

Pour chaque industrie (code à trois chiffres), province et groupe de taille, le plan prévoit une rotation de la portion à tirage partiel de l'échantillon. Chaque mois, le douzième environ de la portion à tirage partiel de l'échantillon est remplacé. Cela signifie qu'en général les unités demeurent 12 mois dans l'échantillon avant d'en sortir par voie de rotation. Les unités ne peuvent pas être choisies de nouveau avant au moins 12 mois suivant leur mois de sortie.

Dans le cas de certaines petites cellules (une cellule regroupe les unités de même industrie au niveau du code à trois chiffres, même province et même groupe de taille), il est parfois impossible d'assurer la rotation des unités chaque mois. Ainsi, il peut arriver que des unités demeurent plus de douze mois dans certaines petites cellules.

## Data edit and correction

All the questionnaires are initially screened for completeness by the interviewers of the Statistics Canada regional offices. Thereafter, extensive computer edit procedures for accuracy and consistency are performed at the Ottawa head office. As a result of any of the above-mentioned editing techniques, the respondent may be contacted to confirm or explain the data.

The edit procedures include the comparison of the values of key characteristics (e.g. number of employees, hours worked, salary per employee, etc.) reported for consecutive months by the same unit in order to detect large changes or errors in reporting. Whenever there is a large change or the data appears inconsistent, the record is signaled by the computer edit for review and is subject to correction or acceptance as appropriate.

## Follow-up

Reporting units which are non-respondents to the initial mailing are followed up by telephone by the staff of the regional offices of Statistics Canada. Priority for this follow-up is given to (i) units which are in the sample for the first time and which have not responded, (ii) units which have not responded for two consecutive months, (iii) large nonrespondent units. Follow-up also takes into account response rates and employment in the various industry groups in determining priority.

If units continue to be non-respondents even after follow-up, then data will be imputed for these units. All the records with imputed values are subject to the edits mentioned above.

## Imputation

Imputation for nonrespondent units which have been in the survey for more than one month is based on the ratio of the monthly changes. The ratio of the monthly change for each characteristic is calculated from units that responded both in the current and the previous month and is applied to the previous month's data of each nonrespondent.

For the nonresponding units that are new to the survey, imputation is based on other sources of information such as the employment intention of the unit, the characteristics of the responding units in the same industry group, province and size.

## Estimates

The basic "building block" for producing the monthly estimates is the three-digit industry, province and size group. Estimates at higher levels are obtained by the aggregation of the above estimates. Estimates of averages are obtained by first estimating the totals for the numerator and the denominator at the desired level and then calculating the ratio. Estimates for certain sub-provincial areas are also produced, treating the sub-

## Vérification des données et correction

Au départ, les interviewers des bureaux régionaux de Statistique Canada s'assurent que tous les questionnaires sont complets. Ultérieurement, le personnel du bureau d'Ottawa vérifie par ordinateur l'exactitude et la cohérence des chiffres déclarés. À chacune de ces deux étapes de vérification, un répondant peut donc être prié de confirmer ou d'expliquer ses chiffres.

Nos procédés de vérification nous permettent de comparer les valeurs de certaines caractéristiques (nombre de salariés, heures de travail, gains par salarié, etc.) déclarées par la même unité plusieurs mois de suite. Ainsi, il est possible de déceler les grandes variations ou les erreurs, s'il en est. Chaque fois qu'une forte variation apparaît ou que les données semblent incohérentes, l'ordinateur signale le cas, et l'enregistrement est aussitôt corrigé s'il comporte effectivement une erreur.

## Méthode de suivi

Le personnel des bureaux régionaux de Statistique Canada relance par téléphone les unités déclarantes qui tardent à répondre au questionnaire. Cette méthode de suivi s'adresse en priorité (i) aux unités qui font partie de l'échantillon pour la première fois et qui n'ont pas encore répondu; (ii) aux unités qui accusent un retard de deux mois consécutifs; (iii) aux grandes unités non répondantes. Pour déterminer l'ordre de priorité des suivis, on tient compte des taux de réponse et du volume de l'emploi dans les différents groupes industriels.

Lorsque des unités persistent à ne pas répondre même après le suivi, des données leurs sont imputées. Tous les enregistrements dont les données découlent d'une imputation sont soumis aux vérifications mentionnées ci-dessus.

## Imputation

L'imputation de données aux unités non répondantes comprises dans le champ de l'enquête depuis plus d'un mois est basée sur le ratio des variations mensuelles de ces unités. Le ratio de la variation mensuelle d'une caractéristique se calcule à partir des unités qui ont répondu pour le mois courant et le mois précédent, et s'applique aux données du mois précédent de chaque unité non répondante.

Dans le cas des unités non répondantes qui figurent dans l'enquête pour la première fois, l'imputation se fonde sur d'autres sources d'information telles que les prévisions d'emploi de l'unité et les caractéristiques des unités déclarantes du même groupe industriel, de la même province et de la même taille.

## Estimations

L'élément de base qui sert à établir les estimations est l'industrie (code à trois chiffres), la province et la taille. Les estimations plus agrégatives sont obtenues par la sommation des estimations susdites. Pour calculer les moyennes, on estime d'abord les totaux du numérateur et ceux du dénominateur, au niveau désiré, puis on en fixe le ratio. Nous produisons aussi des estimations concernant certaines régions infraprovinciales, considérant chacune de ces régions comme un domaine. Enfin, nous

province as a domain. Coefficients of variation for estimates of some key characteristics at all levels are also produced.

Provision has also been made in the estimation procedure to change the weights of "unusually large" observations occurring in size groups 1, 2 and 3. These observations are termed "outliers" and are judged not to be representative of other units in that size group. The weights of the remaining units are adjusted accordingly.

### Reliability of the estimates

There are two types of errors possible in estimates based on a sample survey: sampling and non-sampling.

**Sampling errors** occur because observations are made only on a sample rather than on the entire universe. Estimates based on a sample differ from the figures that would have been obtained if a complete census had been taken using the same questionnaires, instructions, interviewers and processing techniques. This difference with respect to a particular estimate is called the sampling error of the estimate.

**Non-sampling errors** are errors which are not related to sampling and may occur in a survey operation for many reasons. Non-response, coverage and classification errors, differences in the interpretation of the questions, incorrect information from respondents, mistakes in recording, coding and processing of data are examples of non-sampling errors. It should be noted that non-sampling errors also occur in complete censuses. In the Survey of Employment, Payrolls and Hours, efforts to reduce non-sampling errors include careful design of questionnaires, editing of data, follow-up of and imputation for non-respondents and thorough control of processing operations.

### Indicators of sampling error

The sampling error, as described above, is not known. However, it can be estimated from the sample itself by using a statistical measure called the **standard error** of a survey estimate. When the standard error is expressed as a percent of the estimate, it is known as the relative standard error or coefficient of variation.

Alphabetic symbols of the coefficient of variation are used in this publication (see Tables A to F at the end of this explanatory note) to give an indication of the reliability of the estimates and are based on a 12-month average of the coefficients of variation. The ranges of the coefficients of variation and their corresponding alphabetic indicator are given in the following table.

calculons des coefficients de variation pour les estimations de certaines caractéristiques clés, à tous les niveaux.

Le procédé d'estimation comporte en outre des mécanismes qui permettent de changer les poids lorsque des observations "exceptionnellement grandes" apparaissent chez les unités des groupes de taille 1, 2 ou 3. Ces observations, dites "aberrantes", ne sont pas représentatives des autres unités du même groupe de taille, de sorte que l'on rajuste les poids des autres unités en conséquence.

### Fiabilité des estimations

En ce qui concerne les estimations basées sur un sondage, il existe deux types d'erreurs possibles, soit les erreurs d'échantillonnage et les erreurs non liées à l'échantillonnage.

Les **erreurs d'échantillonnage** proviennent de ce que les observations se font à partir d'un échantillon au lieu de l'univers complet. Les estimations basées sur un échantillon diffèrent des statistiques que l'on obtiendrait d'un recensement complet effectué au moyen des mêmes questionnaires, des mêmes directives, des mêmes interviewers et des mêmes techniques de traitement. Cette différence, lorsqu'il s'agit d'une estimation particulière, s'appelle erreur d'échantillonnage de l'estimation.

Les **erreurs non dues à l'échantillonnage** ne se rattachent pas à l'échantillon et peuvent se produire tout au long d'une enquête pour plusieurs raisons. Les cas de non-réponse, les anomalies de couverture et de classification, les différences d'interprétation des questions, la communication de renseignements inexacts par les répondants et les fautes d'entrée, de codage et de traitement des données sont autant d'erreurs non attribuables à l'échantillonnage. Il faut noter que des erreurs de ce genre peuvent aussi se produire dans les recensements. Pour l'enquête sur l'emploi, la rémunération et les heures de travail, nous avons tenté d'en réduire le risque par une formulation soignée des questionnaires, par une vérification rigoureuse des chiffres déclarés, par le travail de suivi, par l'imputation de données aux unités non répondantes et par un contrôle attentif des techniques de traitement.

### Indicateurs des erreurs d'échantillonnage

L'erreur d'échantillonnage que nous venons de décrire reste inconnue. On peut cependant l'estimer à partir de l'échantillon, en utilisant une mesure appelée **écart-type** d'une estimation de sondage. Lorsque l'écart-type est exprimé en pourcentage de l'estimation, on l'appelle écart-type relatif ou coefficient de variation.

Dans la présente publication, nous utilisons des symboles littéraux de coefficient de variation (voir tableaux A à F à la fin de cette note explicative), pour indiquer le degré de fiabilité des estimations; cette symbolisation repose sur la moyenne des coefficients de variation de 12 mois. Les intervalles de confiance des coefficients de variation et les symboles correspondants sont précisés dans le tableau suivant.

## ALPHABETIC INDICATORS OF COEFFICIENT OF VARIATION

Alphabetic Indicator	Range of Coefficient of Variation Percent
A	0 - 1.0
B	1.1 - 2.5
C	2.6 - 5.0
D	5.1 - 10.0
E	10.1 - 15.0
F	15.1 - 25.0
G	> 25.0

The sample estimate and its standard error (derived from the coefficient of variation) may be used to construct an interval within which the unknown census value is expected to be contained with a prescribed confidence. The particular sample used in this survey is one of a large number of all possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. If intervals from two standard errors below the estimate to two standard errors above the estimate are constructed using each of the above estimates, then approximately 19 out of 20 of the intervals would include the census value. Such an interval is called a 95 percent confidence interval. For example, let the estimate under consideration be the total number of paid employees at Canada level in Construction and say it is 450,000 employees. If the estimate has a reliability indicator A, then assuming that the coefficient of variation of the estimate is 1%, the standard error of the estimate would be 4,500 employees. Therefore, in this case, one can say with 95% confidence that the census value of total paid employees in Construction is included in the interval 441,000 to 459,000 employees.

In general, the estimates of monthly changes are expected to be more reliable than the estimates of levels due to the large overlap of reporting units in the monthly samples and the high correlation between the reported values for two consecutive months.

## Statistical Presentation

### 1. Data Revision

Each month, statistics for the two latest months are prepared from the survey of Employment, Payrolls and Hours. Data for the most current month are titled **preliminary** estimates and are based on a response rate of around 80%. Estimates are also prepared for the month immediately preceding the most current month; these are known as **revised** estimates and are based on a higher rate of response (approximately 90%).

## INDICATEURS LITTÉRAUX DU COEFFICIENT DE VARIATION

Indicateur littéral	Intervalle de confiance du coefficient de variation en pourcentage
A	0 - 1.0
B	1.1 - 2.5
C	2.6 - 5.0
D	5.1 - 10.0
E	10.1 - 15.0
F	15.1 - 25.0
G	> 25.0

L'estimation de l'échantillon et son écart-type (établi d'après le coefficient de variation) peuvent servir à construire un intervalle à l'intérieur duquel s'inscrira, sous réserve d'une limite de confiance prédéterminée, la valeur inconnue que l'on obtiendrait par recensement. L'échantillon sur lequel s'appuie notre enquête n'est qu'un des multiples fragments de même taille que nous aurions pu choisir en utilisant le même plan. Les estimations tirées d'autres échantillons du même univers diffèreraient les unes des autres. Si l'on construisait des intervalles allant de deux écarts-types sous l'estimation à deux écarts-types au-dessus de l'estimation, en utilisant chacune des estimations possibles (selon l'échantillon choisi), environ 19 intervalles sur 20 contiendraient alors la valeur que donnerait un recensement. Ce genre d'intervalle se nomme intervalle de confiance à 95%. Prenons par exemple comme estimation le nombre total de salariés de la construction pour l'ensemble du Canada, et supposons que ce nombre soit 450,000. Si l'indicateur de fiabilité de cette estimation est A, et si son coefficient de variation s'établit à 1%, alors l'écart-type de l'estimation sera de 4,500 salariés. Dans ce cas, on peut donc dire avec 95% de confiance que le nombre total de salariés de la construction, obtenu par recensement, se situe dans l'intervalle 441,000 à 459,000 salariés.

En général, on s'attend à ce que les estimations des variations mensuelles soient plus fiables que les estimations de niveaux, par suite de l'ample chevauchement des unités déclarantes au sein des échantillons mensuels, et de la forte corrélation qui existe entre les valeurs déclarées pour deux mois consécutifs.

## Présentation statistique

### 1. Révision des données

Chaque mois, nous préparons, à l'égard des deux derniers mois, des statistiques tirées de l'enquête sur l'emploi, la rémunération et les heures de travail. Les données du mois le plus récent sont appelées estimations **préliminaires** et se fondent sur un taux de réponse d'environ 80%. Nous établissons également des estimations pour le mois qui précède le mois le plus récent; il s'agit d'estimations **révisées** qui prennent appui sur un taux de réponse plus élevé (environ 90%).

## 2. Data Release

As soon as the estimates become available, selected highly aggregated statistics are released in the Statistics Canada Daily, while detailed data are entered in the Canadian Socio-Economic Information Management System (i.e. CANSIM).

Detailed estimates appear in this report at a later date.

## 3. Rounding

Totals and averages for any level of geographical or industrial aggregation are calculated using unrounded figures and then rounded using the usual procedure adopted by Statistics Canada. Published employment figures are rounded to hundreds. The sum of individually rounded items may not always equal the total.

## 4. Averages

The average weekly earnings (including overtime) is obtained by dividing the total weekly payrolls by the number of employees. It is calculated for the total number of employees, for the hourly-rated employees, for the salaried employees, and for the other types of employees.

The average weekly overtime earnings is derived by dividing the overtime weekly payrolls by the number of employees. It is calculated for the total number of employees, the hourly-rated employees and the salaried employees.

The average hourly earnings (including overtime) is obtained by dividing the total weekly payrolls by the total weekly number of hours (the total weekly number of hours is reported for the hourly-rated employees while, for salaried employees, it is derived by multiplying the average standard workweek hours by the number of salaried employees). It is calculated for the hourly-rated employees and for the salaried employees.

The average hourly overtime earnings is calculated for the hourly-rated employees by dividing the overtime weekly payrolls by the weekly number of overtime hours reported for this group of employees.

The average weekly hours (including overtime) is obtained by dividing the total weekly number of hours by the number of employees. This statistic is calculated for the hourly-rated employees and the salaried employees.

The average weekly overtime hours is derived by dividing the weekly number of overtime hours by the number of employees. This average is calculated for the hourly-rated employees.

## 2. Diffusion des données

Dès que les estimations requises sont disponibles, des statistiques choisies à un niveau d'agrégation élevé paraissent dans le Quotidien de Statistique Canada, tandis que les chiffres détaillés sont introduits dans le Système canadien d'information socio-économique (CANSIM).

Les estimations détaillées apparaissent dans ce bulletin plus tard.

## 3. Arrondissement

Les totaux et les moyennes des divers niveaux d'agrégation géographique ou industrielle sont calculés au moyen des chiffres bruts, ensuite arrondis conformément à la méthode d'arrondissement habituelle de Statistique Canada. Les nombres publiés concernant l'emploi sont arrondis à la centaine. Par conséquent, il peut arriver que la somme des chiffres arrondis individuellement ne corresponde pas au total.

## 4. Moyennes

On obtient les rémunérations hebdomadaires moyennes (y compris celles du surtemps) en divisant les rémunérations hebdomadaires totales par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure, d'employés et des autres catégories de salariés.

Pour obtenir les rémunérations hebdomadaires moyennes du surtemps, on divise les rémunérations hebdomadaires du surtemps par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure et d'employés.

On obtient les gains horaires moyens (y compris la rémunération du surtemps) en divisant les rémunérations hebdomadaires totales par le nombre total hebdomadaire d'heures travaillées (le nombre total d'heures hebdomadaires est celui déclaré pour les salariés rémunérés à l'heure, tandis que dans le cas des employés on l'établit en multipliant la moyenne des heures fournies pendant la semaine normale de travail par le nombre d'employés). Nous calculons cette statistique à l'égard des salariés rémunérés à l'heure et des employés.

Quant au surtemps, on calcule les gains horaires moyens des salariés rémunérés à l'heure en divisant les rémunérations hebdomadaires du surtemps par le nombre d'heures hebdomadaires de surtemps déclarées pour ce groupe de salariés.

Pour déterminer les heures hebdomadaires moyennes (y compris le surtemps) on divise le total des heures hebdomadaires par le nombre de salariés. Cette statistique est établie à l'égard des salariés rémunérés à l'heure ainsi qu'à l'égard des employés.

Pour calculer les heures supplémentaires moyennes hebdomadaires on divise le nombre d'heures supplémentaires hebdomadaires par le nombre de salariés.

The average weekly earnings (excluding overtime) is obtained by dividing the weekly payrolls, which exclude the overtime weekly payrolls, by the number of employees. This estimate is calculated for hourly-rated employees and salaried employees.

## 5. Unpublished Data

A large number of non-confidential detailed industrial and geographic estimates are compiled but not included in this report. Although the reliability of these estimates is lower than the reliability of the published estimates, these data will be available on request.

In addition to the total number of employees for the education industry, data are also available for the teaching and non-teaching staff separately.

## 6 CANSIM

Data published in this report are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System).

Tables giving the CANSIM matrix numbers, the CANSIM series numbers and the types of survey estimates are presented at the end of this explanatory text (see Tables I to V) to provide the user with an easy and quick link to the CANSIM system.

Generally speaking, the CANSIM matrix number identifies a type of survey estimates for a particular geographic area, while the CANSIM series number represents an industrial level. Owing to the different types of data aggregations (all units, take-all units, take-some units) and to the large number of survey estimate types (number of employees, average hourly earnings of hourly-rated employees, etc.), the user will have to follow the steps given hereafter to select the proper CANSIM matrix and series numbers.

a) Determine the type of tabulated information needed (this will define the value of "x" for the CANSIM series number of Table II):

- i) Aggregation of all survey units has the value 1,
- ii) Aggregation of take-all units has the value 2 and
- iii) Aggregation of take-some units has the value 3.

b) Determine the type of survey estimates required; this will provide the value of "y" for the CANSIM series number. This value is obtained by consulting Table I which lists the 20 types of survey estimates; the number of salaried employees, for example, constitutes type 2.

La moyenne des rémunérations hebdomadaires (surtemps exclu) s'obtient en divisant les rémunérations hebdomadaires, qui excluent les rémunérations hebdomadaires du surtemps, par le nombre de salariés. Cette estimation est calculée à l'égard des salariés rémunérés à l'heure, de même qu'à l'égard des employés.

## 5. Données non publiées

Nous établissons, aux niveaux industriel et géographique, un grand nombre d'estimations non confidentielles détaillées qui, toutefois, ne figurent pas dans le présent ouvrage. Bien que leur fiabilité soit plus faible que celle des estimations publiées, ces données peuvent être obtenues sur demande.

Outre le chiffre total des salariés du domaine de l'éducation, nous pouvons aussi fournir des données distinctes concernant le personnel enseignant et le personnel non enseignant.

## 6. CANSIM

Les données qui apparaissent dans la présente publication sont également disponibles sous une forme ordinaire dans CANSIM (Système canadien d'information socio-économique).

Les intéressés trouveront à la fin de ces notes explicatives des tableaux indiquant les numéros des matrices CANSIM, les numéros des séries CANSIM et les types d'estimations de l'enquête (voir tableaux I à V). Ces tableaux fournissent à l'utilisateur un moyen d'accès facile et rapide au système CANSIM.

De façon générale, le numéro de matrice CANSIM désigne un type d'estimation de l'enquête pour une région géographique particulière, tandis qu'un numéro de série CANSIM désigne un niveau industriel. En raison de la multiplicité des types d'agrégation (ensemble des unités, unités à tirage complet, unités à tirage partiel) et des nombreux types d'estimations de l'enquête (nombre de salariés, salaires horaires moyens des salariés rémunérés à l'heure, etc.), l'utilisateur devra franchir les étapes suivantes pour choisir les bons numéros de matrice et de série CANSIM.

a) Déterminer le type désiré de totalisation parmi les cas suivants (cette opération définira la valeur de "x" pour le numéro de série CANSIM au tableau II):

- i) ensemble des unités de l'enquête: vaut 1,
- ii) unités à tirage complet: vaut 2 et
- iii) unités à tirage partiel: vaut 3.

b) Déterminer le type requis d'estimations de l'enquête; cette opération fixera la valeur de "y" pour le numéro de série CANSIM. On obtient cette valeur en consultant le tableau I, qui contient la liste des 20 types d'estimations de l'enquête; le type "employés", par exemple, a la valeur 2.

- c) Determine the industrial level needed and refer to the Industry Code column of the CANSIM series number Table II to find the rest of the series number (e.g. Industry Code 031 has series number **x.y.1.1.1.1**).
- d) Determine the geographical level required and refer to the CANSIM matrix number tables (Tables III to V) to select the appropriate matrix number.

A specific example would be as follows. The "average weekly overtime earnings of salaried employees" for "all survey units" is needed for the Ontario total manufacturing. The CANSIM series number will be 1.13.1.1.3 according to:

- i) The "x" value of 1 for the "All survey units" aggregation,
- ii) The "y" value of 13 for the type of survey estimates and
- iii) The tail-end of the series number 1.1.3 for the manufacturing Industry Code 101-399.

The CANSIM matrix number will be 8375 because the type of estimates 13 is required for Ontario.

It should be noted that only two types of survey estimates are available for the Census Agglomerations (i.e. estimates 01: total number of employees, and 05: average weekly earnings (including overtime) of all employees), while twenty types of estimates are available for Canada, the provinces and the Census Metropolitan Areas.

For further information on CANSIM call (613) 995-7406 or write CANSIM Division, Statistics Canada, R.H. Coats BLDG., Ottawa, Ontario, K1A 0T6.

## 7. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

- c) Déterminer le niveau industriel désiré et utiliser la colonne "code des industries" du tableau II des numéros de série CANSIM pour trouver les autres chiffres du numéro de série (par ex. le code d'industrie 031 possède le numéro de série **x.y.1.1.1.1**).
- d) Déterminer le niveau géographique requis et utiliser les tableaux de numéros de matrice CANSIM (Tableaux III à V) pour choisir le numéro de matrice approprié.

Voici un exemple. Supposons que l'on veuille connaître la "rémunération hebdomadaire moyenne du surtemps des employés" de "l'ensemble des unités de l'enquête" pour les manufactures de l'Ontario. Le numéro de série CANSIM sera 1.13.1.1.3, puisque:

- i) la valeur de "x" pour le groupe "ensemble des unités de l'enquête" est 1,
- ii) la valeur de "y" pour le type d'estimation est 13, et
- iii) la fin du numéro de série pour le "code d'industrie" des manufactures 101-399 est 1.1.3.

Le numéro de matrice CANSIM sera 8375, car le type d'estimation 13 s'applique à l'Ontario.

Notons qu'il n'existe que deux types d'estimations au niveau des agglomérations de recensement (i.e. les estimations 01: nombre total des salariés, et 05: salaires hebdomadaires moyens (y compris le surtemps) pour l'ensemble des salariés), alors qu'il y a vingt types d'estimations disponibles aux niveaux du Canada, des provinces et des régions métropolitaines.

Pour de plus amples informations concernant CANSIM, téléphoner à (613) 995-7406 ou écrire à Division CANSIM, Statistique Canada, immeuble R.H. Coats, Ottawa, Ontario, K1A 0T6.

## 7. Confidentialité

Les données du présent bulletin sont vérifiées afin de s'assurer qu'elles respectent le caractère confidentiel des réponses fournies par les entreprises.

TABLE A. Indicators of the Coefficients of Variation by Industry, Canada

TABLEAU A. Indicateurs des coefficients de variation par activité économique, Canada

TABLE I. Type of Estimates

TABLEAU I. Type d'estimations

Estimates Estimations	Description
1	All employees - Ensemble des salariés
2	Salaried employees - Employés
3	Employees paid by the hour - Salariés rémunérés à l'heure
4	Other employees - Autres salariés
5	Average weekly earnings (including overtime) of all employees - Rémunération hebdomadaire moyenne (incluant le surtemps) de l'ensemble des salariés
6	Average weekly earnings (including overtime) of salaried employees - Rémunération hebdomadaire moyenne (incluant le surtemps) des employés
7	Average weekly earnings (including overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (incluant le surtemps) des salariés rémunérés à l'heure
8	Average weekly earnings (including overtime) of other employees - Rémunération hebdomadaire moyenne (incluant le surtemps) des autres salariés
9	Average weekly earnings (excluding overtime) of all employees - Rémunération hebdomadaire moyenne (excluant le surtemps) de l'ensemble des salariés
10	Average weekly earnings (excluding overtime) of salaried employees - Rémunération hebdomadaire moyenne (excluant le surtemps) des employés
11	Average weekly earnings (excluding overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (excluant le surtemps) des salariés rémunérés à l'heure
12	Average weekly overtime earnings of all employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, ensemble des salariés
13	Average weekly overtime earnings of salaried employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, des employés
14	Average weekly overtime earnings of employees paid by the hour - Rémunération hebdomadaire moyenne pour travail supplémentaire des salariés rémunérés à l'heure
15	Average weekly hours of salaried employees - Heures hebdomadaires moyennes des employés
16	Average weekly hours of employees paid by the hour - Heures hebdomadaires moyennes des salariés rémunérés à l'heure
17	Average weekly overtime hours of employees paid by the hour - Heures supplémentaires hebdomadaires moyennes des salariés rémunérés à l'heure
18	Average hourly earnings of salaried employees - Rémunération horaire moyenne des employés
19	Average hourly earnings (including overtime) of employees paid by the hour - Rémunération horaire moyenne (incluant le surtemps) des salariés rémunérés à l'heure
20	Average hourly overtime earnings of employees paid by the hour - Rémunération horaire moyenne du travail supplémentaire, des salariés rémunérés à l'heure

## ANNEX 2

### "INDUSTRIAL COMPOSITE" ESTIMATES

For data produced on employment, payrolls, and hours prior to April 1983, there was an aggregate entitled "Industrial Composite". This covered all sectors except agriculture, government, defence, hospitals, schools, religion, household services, and fishing, trapping and hunting; in addition, only firms with 20 or more employees were surveyed. Therefore, neither employment nor average weekly earnings for the Industrial Composite were ever intended to be global measures.

With the beginning of the Survey of Employment, Payrolls and Hours (SEPH) in April 1983, the Industrial Composite classification ceased to have its original justification. The SEPH survey has much more complete coverage than its predecessor, and its aggregates provide much fuller coverage of the economy, both by industry and by size of employer, than did the Industrial Composite. For this reason, it was decided not to continue the Industrial Composite as a regular SEPH output. Users are encouraged to change to the new published data as soon as possible.

It is recognized, however, that in some cases the term "Industrial Composite" has been officially incorporated into formal documents. In these cases, it may require some time to alter the wording of the documents to incorporate the new statistics. To assist in such efforts, a special synthetic series, approximating the old Industrial Composite totals from SEPH data, is produced hereafter.

As a word of warning, because of changes in coverage, survey procedures, question wording and other factors that accompanied the survey revisions in April 1983, it is not possible to exactly reproduce the Industrial Composite. However, research has indicated that it is possible by combining selected subcategories to construct data series in which the average weekly earnings for Canada and provinces normally differ from previous data by one percent or less. These derived totals will be released until December 1985.

## ANNEXE 2

### ESTIMATIONS DE L'"ENSEMBLE DES INDUSTRIES"

Avant avril 1983, nous produisions des données sur l'emploi, la rémunération et les heures pour un regroupement appelé "ensemble des industries". Ce regroupement couvrait tous les secteurs de l'industrie sauf l'agriculture, le gouvernement, la défense, les hôpitaux, les écoles, les organismes religieux, les ménages privés, la pêche, le piégeage et la chasse; de plus, seules les firmes ayant 20 salariés ou plus étaient enquêtées. Ainsi, l'emploi et la rémunération hebdomadaire moyenne pour ce regroupement n'ont jamais constitué des mesures globales.

Avec les débuts de l'Enquête sur l'emploi, la rémunération et les heures de travail (EERH), le regroupement "ensemble des industries" n'a plus de raison d'être. L'enquête EERH couvre beaucoup plus de secteurs que l'enquête qu'elle remplace. De plus, ses regroupements représentent une couverture beaucoup plus complète de l'économie, tant par industrie que par taille d'employeur. Nous avons donc décidé de ne pas publier l'"ensemble des industries" dans le cadre de l'enquête EERH. Pour cette raison, nous recommandons aux utilisateurs de se tourner vers les nouvelles données publiées aussitôt que possible.

Nous reconnaissons que, dans certains cas, le terme "ensemble des industries" soit inclus officiellement dans le texte de documents formels. Il peut arriver que dans ces situations le changement de formulation pour s'accorder aux nouvelles statistiques demande un certain temps. Pour venir en aide aux utilisateurs pendant ce temps, nous publions ci-après des séries spéciales qui sont des approximations des anciennes séries de l'"ensemble des industries", calculées à partir des données de l'EERH.

Il ne faut pas oublier qu'il s'agit d'approximation. En effet, il est impossible de reproduire exactement l'"ensemble des industries" à cause des changements touchant la couverture de l'enquête, les règles de l'enquête, la formulation des questions et d'autres facteurs accompagnant la révision de l'enquête en avril 1983. Cependant, des recherches ont montré qu'il était possible, en combinant certaines sous-catégories, de construire des séries de données pour lesquelles la rémunération hebdomadaire moyenne pour le Canada et les provinces ne différerait des données réelles que de 1% ou moins. Nous publierons ces séries dérivées jusqu'au mois d'enquête: décembre 1985.

**Estimates of Average Weekly Earnings for "Industrial Composite",  
Canada and Provinces**

**Estimations de la rémunération hebdomadaire moyenne pour l'"ensemble des industries",  
Canada et provinces**

Area Région	Average weekly earnings Rémunération hebdomadaire moyenne	
	March 1984 Mars	April 1984 Avril
<b>CANADA(1)</b>	<b>431.81</b>	<b>433.31</b>
Newfoundland - Terre-Neuve	385.73	394.32
Prince Edward Island - Île-du-Prince-Édouard	303.81	298.30
Nova Scotia - Nouvelle-Écosse	368.65	367.12
New Brunswick - Nouveau-Brunswick	385.70	385.21
Québec	428.12	427.90
Ontario	427.13	427.84
Manitoba	386.77	387.08
Saskatchewan	407.64	411.47
Alberta	471.59	470.76
British Columbia - Colombie-Britannique	476.28	486.74

(1) Includes Yukon and Northwest Territories. - Comprend le Yukon et les Territoires du Nord-Ouest.

## ANNEX 3

### Industry Conversion

The Survey of Employment, Payrolls and Hours uses the 1970 version of the Standard Industrial Classification, while the previous survey used the 1960 version.

There are some 1960 industry codes which simply do not have an equivalent 1970 code. For these industries, it is not possible to have a link between the old and new data. There are other 1960 industry codes which have only a partial fit with a 1970 code. These cases need to be qualified with a quality indicator. The indicators have been defined as follows:

- A = 100% overlap (complete match)
- B = less than 100% but at least 90% overlap
- C = less than 90% but at least 75% overlap
- D = less than 75% but at least 50% overlap
- E = anything less than 50%

It might be fair to interpret these letters as follows:

- A = excellent
- B = very good
- C = adequate
- D = marginal
- E = of no value

Note that the quality assessment used here does not include the fact that in many series, for purposes of gathering payroll and hours, a substantial number of small employers were added, the questionnaire wording and concepts were altered, and the survey procedures were changed.

## ANNEXE 3

### Conversion des industries

L'enquête sur l'emploi, la rémunération et les heures de travail fait usage de la version 1970 de la Classification des activités économiques, alors que les enquêtes antérieures utilisaient la version 1960.

Certains codes d'activité économique de 1960 n'existaient plus en 1970. Dans ce cas, il est impossible de lier les anciennes et les nouvelles données. D'autres codes de 1960 ne recoupent que partiellement ceux de 1970. Dans ces cas, on doit appliquer un indicateur de qualité. Ces indicateurs sont qualifiés comme suit:

- A = recouplement complet (100%)
- B = recouplement inférieur à 100% mais d'au moins 90%
- C = recouplement inférieur à 90% mais supérieur à 75%
- D = recouplement inférieur à 75% mais supérieur à 50%
- E = recouplement inférieur à 50%

Il convient de les interpréter comme suit:

- A = excellent
- B = très bien
- C = convenable
- D = médiocre
- E = sans valeur

Il convient de souligner que cette évaluation qualitative ne tient pas compte du fait que, dans plusieurs séries, un nombre important de petites entreprises ont été ajoutées dans le but de recueillir leurs données sur la rémunération et les heures; elle couvre, pas non plus les différences de formulation et de concepts dans les questionnaires, ni les différentes procédures d'enquête.

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

### Catalogue

#### Monthly

72-002 Employment, Earnings and Hours. Bil.

Industry and area data on industrial employment, average weekly earnings average weekly hours and average hourly earnings.

72-008 Estimates of Employees by Province and Industry. Bil.

Monthly estimates of total employment in non-agricultural industries for Canada and the provinces. (This publication is terminated with March 1983 data).

#### Quarterly

72-005 Estimates of Labour Income. Bil.

Monthly estimates of wages and salaries and supplementary labour income on unadjusted and seasonally adjusted basis by industry for Canada and the provinces with annual totals.

#### Occasional

72-516 Estimates of Employees by Province and Industry, 1961-1976. Bil.

Monthly estimates of total employees by industry and province in the non-agricultural sector - both seasonally adjusted and unadjusted series, 1961-1976.

72-517 Employment, Earnings and Hours, 1978. Bil.

Employment, earnings and hours statistics for the months of January to April 1978 inclusively which supersede data previously published in the monthly publication 72-002.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

#### Mensuel

72-002 Emploi, gains et durée du travail. Bil.

Données par industrie et par région sur l'emploi, les gains hebdomadaires moyens du travail, les gains horaires moyens et les heures hebdomadaires moyennes.

72-008 Estimations du nombre de salariés par province et par industrie. Bil.

Estimations mensuelles de l'ensemble des effectifs dans les industries non agricoles pour le Canada et les provinces. (Cette publication se termine avec les estimations de mars 1983).

#### Trimestriel

72-005 Estimations du revenu du travail. Bil.

Estimations mensuelles des salaires, des traitements et du revenu supplémentaire du travail, désaisonnalisées et non désaisonnalisées, par branche d'activité économique pour le Canada et les provinces, de même que des totaux annuels.

#### Hors série

72-516 Estimations du nombre de salariés par province et par industrie, 1961-1976. Bil.

Estimations mensuelles désaisonnalisées et non désaisonnalisées du nombre total de salariés par industrie et par province pour l'ensemble des industries non agricoles de 1961-1976.

72-517 Emploi, gains et durée du travail, 1978. Bil.

Chiffres révisés de l'emploi, des gains et de la durée du travail pour les mois de janvier à avril 1978 inclusivement. Ces données remplacent celles qui avaient été précédemment publiées dans les éditions mensuelles de la publication numéro 72-002 au catalogue.
